RIGAMAJIG

BRAIN POWERED!

Rigamajig is a building kit conceived for hands-on free play and learning. It is a collection of wooden planks, wheels, pulleys, nuts, bolts and rope designed to engage the inquisitive mind and creative spirit of children. Through playing they think three dimensionally, create physically, and work collaboratively. Building with this simple set of parts will help your child combine imagination with cognitive thinking & invention, embrace process over outcome, and empower them to be makers of thier own world.

PLAY SAFE

Children should be supervised at all times.

Rigamajig contraptions should never be climbed on, stood upon, or ridden.

Encourage children to be aware of their surroundings and play cooperatively.

When taking things apart be aware of cause and effect when removing and loosening parts.
