### ANNUAL REPORT SET SWISS ENERGY TRADING

2015 has been another very challenging year: Oil prices have remained low, over the last few years decreasing by more than 50%. The natural gas prices in Europe were falling as well and our industry finds itself in a position not seen for many years.

However, SET Swiss Energy Trading AG was able once again to successfully strengthen its market position and continue on its forward-looking course in 2015. Revenues and Earnings remained at similar levels compared to last year. SET continues to be on a steady profitable path. Our clear focus on niche markets and specialties helped to dampen some of the negative global influences. We do however foresee a further decline in the margins and combined with the low price environment, these factors will be the prime challenges during 2016. Whilst opportunities in the physical market continue to exist, we are increasingly vigilant in respect of counterparty risks as current price levels will inevitably test some market participants.

Nevertheless, SET is looking with a lot of confidence into the future. Our very lean structure combined with a highly efficient, dynamic organization gives us the necessary confidence to successfully manage the challenges of the future. The strong focus on adding value to our customers and the development of new niche products will help to achieve our goals.

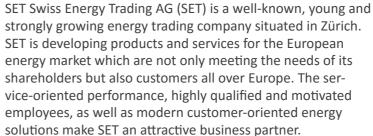

I would like to thank all of our customers for supporting us in 2015. It is our utmost priority to serve you the best way we can also in 2016 by offering you innovative products at attractive conditions for your needs to be successful.

On behalf of the entire Board of Directors I would like to extend my thanks to the entire SET team and its Delegate for providing an excellent job during a hectic and challenging year. I also would like to extend my thanks to my colleagues on the Board of Directors and the members of our risk committee for their continued support and excellent cooperation.

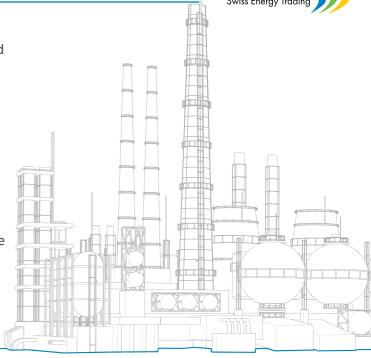

André Dosé

Chairman of the Board

## OVERVIEW -

SET belongs 100% to Swissgas, which has a long tradition in the Swiss natural gas market with procuring natural gas for Switzerland and transporting it to its shareholders all over the country. Swissgas presents a strong partner and support for SET.

## **SET'S DEVELOPMENT IN 2015**

Swiss Energy Trading

The trading year 2015 was another successful year for SET. The trading volume has increased in comparison with year 2014 due to more opportunities emerging in the market. Main focus lied on the market access for SET's shareholders and providing them with complementary risk management and hedging services. The customers of SET value the individual approach with the tailor-made products designed exactly for their needs. These products are available for the customers in the majority of European gas hubs.

### SHAREHOLDERS OF SET
