

CABINETS, BUILT IN TACOMA SINCE 2005.

✦ Founder's Choice

Our Mission

We believe in doing our best to make manufacturing in the United States increasingly sustainable and to be as transparent about our processes as possible, thereby providing our employees with meaningful work and a positive culture they can be proud of.

Craftsman Series

When every detail is checked and checked again, you are presented with our finest cabinet line, the Craftsman Series. Available in a wide range of finishes and door styles.

Select Series

Featuring a versatile shaker doorstyle, the Select series is our popular, quick turnaround offering.

See mark throughout for further details:

Finishes & Colors

With an in-house finishing department, Founder's Choice is able to consistently achieve outstanding quality and turnaround times. Our finishes are not only timeless but will also stand up to a lifetime of use and wear.

We only use finishes that live up to our standards:

- Post-Catalyzed Conversion Varnish
- Excellent Household Chemical Resistance
- Scratch & Mar Resistant

Wheat

Mocha

Nutmeg

Merlot

Espresso

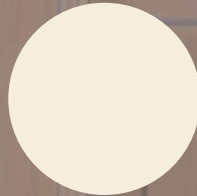

Ash

Cappuccino

Slate

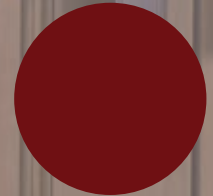

Linen

Pearl

Biscuit

Cranberry

Door Styles

Possibly the most defining choice you will make about your kitchen is the door style. Even a simple door style can become complex when paired with certain colors and wood species. Featuring traditional 5 piece construction and 3" rails, our solid wood Craftsman Series doors are made in the USA.

- ⑤ Our Select Series comes exclusively in the Pioneer door style with 2¼" rails.

Regent

Union

Pioneer

Whitman

Old Town

McCormick

Grandview

Ruston

Orchard

Pacific

Proctor

Lexington

Bridgeport

Wood Species

Choosing a wood species is just as important as choosing a doorstyle or color.

The wood used in your cabinets is a subtle detail that can be used to dial in the exact look you are going for, whether it's modern or traditional.

Alder, Beech and Cherry available in rustic varieties.

 Select Series only available in Birch species.

MAPLE

4

ALDER

OAK

BEECH

CHERRY

Construction

Our cabinets are designed to be a constant in your new kitchen; install them and let them do their job. We stand by them with a Limited Lifetime Warranty, though we doubt you will ever need it.

Quality Control

Three Inspections:

1. Raw Materials
2. Construction
3. Finish Quality

Plywood Boxes

Plywood is arguably the most durable wood product available. That is why we use it.

I-Beam Construction

Lateral plywood above the drawer box keeps our cabinets stiffer, stronger, and longer lasting.

Dovetail Drawer Boxes

Dovetails not only look nice, they are the strongest joint we can use in our solid wood drawer boxes.

Durability

From kids using the kitchen as a playground to everyday wear and tear, our cabinets wear it well. We have designed Founder's Choice Cabinetry as a standard for others to be judged by. We are proud to say our cabinets meet and exceed KCMA testing standards.

150 Lb. static
shelf capacity.

Excellent resistance to
household chemicals.

75 Lb. dynamic
drawer capacity.

Drawer Slides

Our full extension drawer slides sit beneath the drawer, hidden from view, and support the loaded drawer from below rather than from the side. Imagine our slides as a sturdy forklift rather than an overloaded bookshelf.

Full Extension drawer slides give you access to everything inside.

Hinges

Do you recall having to deal with a sticky cabinet door, or maybe one cabinet door interfering with another? Your cabinet doors should open and close smoothly and quietly for years to come. We are so confident in our hinges that we back them with our Limited Lifetime Warranty.

With a six way adjustable hinge, you or your installer are able to perfectly align your new cabinets.

Custom Options

As every human body is different, so is every home. We are able to design and optimize your new kitchen floor plan to meet your needs. While our stock cabinet offerings are versatile, sometimes there is a need for a special cabinet or finish to pull it all together seamlessly.

- Custom Depths in Any Cabinet
- Custom Paint Or Stain to Match Existing Colors
- Glazing and Distressing on Any Color
- Glass Doors with Mullions
- Finished Interiors
- Extended Styles
