

To whom it may concern,

In the spring of 2012, we had the opportunity to become a construction partner with Frandsen Architects, PC. Through a qualification-based selection process, they and Trehel were selected for a high-quality healthcare project that produced local and regional attention.

Throughout the design development and the construction process, I found Frandsen Architects to be one of the most attentive and detail-oriented architecture firms that I that I have worked with over my 30 year career. Their designs are creative, yet straightforward. Their drawing details are comprehensive and easy to interpret. They also use the most up-to-date technology including 3D fly-thru models that are not only effective in presentations to owners, but very helpful for constructability evaluations. I found their staff to be of high integrity and also flexible in their thinking as to application and implementation of the designs. RFI's and Submittals were handled quickly and effectively and discussions and solutions were encouraged where any question or conflict might arise. There is mutual respect among our firms and we have developed a cordial communication style that is appreciated in today's high-paced work atmosphere.

Overall, they produced high quality construction documents and due to the attributes that I have listed above, I have since selected them to be our design partner on another healthcare project where we will deliver the project as a Design-Build team. I look forward to continuing to work with them in the future.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tim Murphy".

Tim Murphy
Vice President / Project Manager
