

October 30, 2013

To Whom It May Concern,

The purpose of the letter is to express my strong satisfaction with Frandsen Architects, PC. I have worked directly with their firm on a number of projects related to Eastside Medical Center in Snellville, Ga. They have always been attentive to our facilities needs in determining the most cost effective, efficient, and attractive manner to deliver our projects.

I have used them to do drawings for Certificate of Need applications for project submittal to the State of Georgia, project planning, future space planning, design build projects and multimillion dollar projects. Every instance we saw outstanding results and completed projects that met the needs of our patients, staff and physicians.

I would like to highly recommend Frandsen Architects as a high quality firm who can meet many needs within today's competitive environment.

Sincerely,

Richard Tumlin, FACHE
Chief Operating Officer, Southern Hills Medical Center and
Former Chief Operating Officer of Eastside Medical Center
