- Wound repair (including: stitches or surgical glue)
- Foreign Object and Splinter Removal

## PRESTIGE COVERED SERVICES

If you are unsure whether your condition is something we can treat, give us a call and we will help direct you to the best place to receive the care you need.

### LABORATORY TESTS

Prestige offers basic on-site laboratory testing at no additional charge (such as pregnancy testing, strep throat testing, flu testing, urinalysis, and others). For all other tests not performed on-site, we send samples to outside laboratory partners for processing. If you prefer to file your insurance company to pay for these tests, we will send your information to the laboratory and they will bill your insurance plan, with any uncovered charges billed to you. However, Prestige Urgent Care members receive negotiated cash discounts of over 50% for outside lab services. If you would like to take advantage of our discounted cash pricing, you may pay directly at the time of service. Any outside lab tests and their associated costs will be discussed with you before they are ordered.

### X-RAY & DIAGNOSTIC SERVICES

We provide X-ray services free of charge to our members and additional diagnostic services such as EKG, Pulse Oximeter, Pulmonary Function Testing, Slit Lamp Eye Exam, and others. If you require outside imaging, such as an MRI, we will send you to our imaging partner where as a Prestige Member you can receive a significant cash discount, or use your insurance coverage.

### VACCINES/INJECTIONS

Prestige services do not cover vaccines. Adult vaccines are charged at cost. Our services do cover routine injections such as IM medications and therapeutic injections.

### IN-HOUSE PHARMACY

*(Coming Soon)*

Prestige will send your prescriptions to the pharmacy of your choice, including mail order. As an alternative, you can enjoy the convenience of purchasing reasonably priced generic drugs and some non-generic drugs at our in-house pharmacy.

### SERVICES NOT INCLUDED

Prestige membership does not cover services performed outside our clinic such as imaging, specialized laboratory work, hospital stays, visits to the emergency room, or specialty care. Additional exclusions are ambulance transportation, specialty pain management, maternity care, neonatal care, alcoholism or substance abuse treatments, vaccines or fracture casting.
