URME SURVEILLANCE PAPER MASK
Print at Home Kit

www.URMESurveillance.com   **#URMEMASK**

Congratulations on downloading the URME SURVEILLANCE PAPER MASK print at Home Kit. The following are a set of instructions/suggestions on how to go about printing and assembling your kit.

Paper

The URME Surveillance Paper Mask should be printed on heavy cardstock paper. Regular printer paper is too flimsy, will wrinkle easily, and won't hold up to wear an tear. 65 lbs cardstock is usually a good weight. URME uses Neenah paper for its affordability, quality and availability on Amazon but any good quality card stock will work

Printers

Most color printers will print out the URME Surveillance Paper Mask just fine however photo printers are best because they allow you print borderless. Though only the front (pg2) needs to be printed to make the mask, consider double sided printing of the front and back (pg3) of the kit for the full URME experience. Consult your printer manual for double sided printing options

Printing

When printing first make sure that you are printing in PORTRAIT orientation and that your page size is set to letter SHEET FEEDER/BORDERLESS (or just letter/8.5 x11 if your printer doesn't print borderless). This can be found in your print dialouge box. Also make sure to set your quality setting to PHOTO.

If your printer isn't equiped to print borderless, than print the paper mask using the SCALE TO FIT MEDIA setting in your printer dialouge
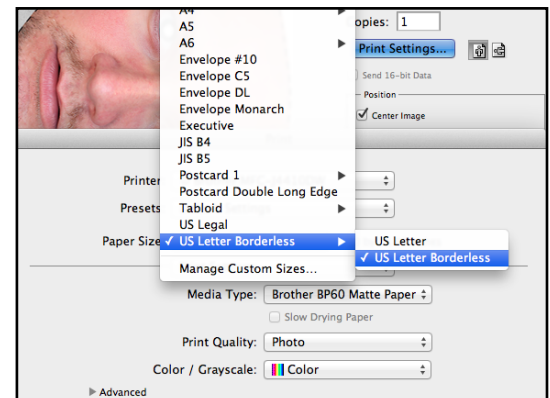

Assembly

1. Begin by cutting out the mask with a pair of scissors. Use the dotted lines as a guide.

2. Next use the Xacto knife to cut out holes in the eyes. the size of the holes will vary. Make sure you can see through the mask comfortably and safely.

3. Use the hole puncher to punch a hole on the right and left temple of the mask at eye level. Then take the elastic cording cut a length long enough to secure the mask to your head. Knot each end to the holes you just made in the mask.
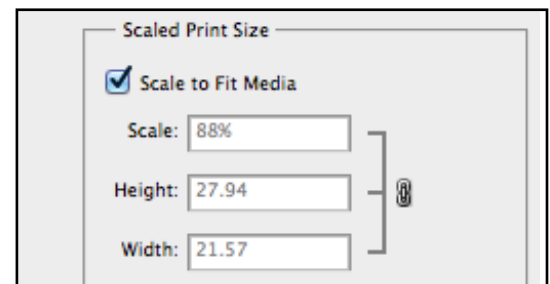

4. Wear the Mask

Tools

Some tools you may find useful

1. Scissors
2. Xacto/hobby knife
3. Single hole-puncher
4. rubber bands or elastic cording

It was terribly dangerous to let your thoughts wander when you were in any public place or within range of a telescreen. The smallest thing could give you away…In any case, to wear an improper expression on your face was itself a punishable offense. There was even a word for it in Newspeak: facecrime.

George Orwell, 1984
