

# RED

## Rackmount Erasure Device Series

### Ideal for in-facility, mid to high-volume, loose drive & disk enclosure erasure

RED series is an industrial-level, fully customizable, portable data center erasure system, designed to be operated from a single location (Data Center, Erasure Lab, ITAD Facility, etc). It is capable of more throughput than any software-only erasure utility. Engineered to erase dozens of frames and thousands of drives, it attaches directly to storage media, which allows it to perform erasure exponentially faster than bootable solutions. Optional external connections allow erasure of entire arrays.

### Turn-key, ultra-high volume hard drive erasure appliance

#### Features:

- Certified data erasure
- Available with no usage limitations and no per-drive fees
- Loose drive support for SAS/SATA
- Accessories expand support to IDE 3.5" & 2.5", ZIF, USB etc.
- 16, 24 and 48-bay models available
- Dedicated 6Gb/s lane for each drive bay

#### Configurable to Support:

- SAS/SATA (adaptable to IDE)  
| 1.5Gb, 3Gb, 6Gb
- SCSI  
| U320, U160 and Lower
- Fibre Channel  
| HSSDC(2), LC, SC | 1Gb, 2Gb, 4Gb, 8Gb
- iSCSI  
| 1394, USB & eSATA

#### Other Data Erasure Solutions from DestructData, Inc.

**Cypher Series**  
Ultra-Portable Erasure Device

**PEEK**  
Portable Erasure Device

#### X-Ponent

- Expansion Accessories

Expansion accessories for all drive types that add more toolless loose drive connections. Compatible with external SAS connections on RED, PEEK and Cypher products.
