

Darbee Visual Presence™

DARBLET™

Overview

Darbee Visual Presence™ technology establishes a fundamental breakthrough for image realism.

By embedding 2D and 3D pictures with depth information, a new visual experience is born.

Images actually help you to see them better.

Enabled by parallel processing in a single chip, DVP represents the next generation of computational image processing for depth and realism. **Your eyes will thank you!**

Features

- HiDef, Gaming, Full Pop viewing modes
- Upgradeable after purchase
- HDMI 1.4 compliant, works with 3D
- Deep color, 30-bit 4:4:4
- One HDMI input, one HDMI output
