Why invest in better health data?

- Increase supply of health data
- Increase demand for health data
- Increase use of data for decision-making

Data systems are functions but not investments unless they are able to prevent clinicians and decision-makers from using data fully to improve service delivery, increase quality and make informed decisions on limited resources.

How will this project improve data for decision-making?

- Make data available for clinicians, decision-makers and researchers
- Increase quality of data
- Increase access and use of data
- Improve response to information needs

What will be improved and how will it be measured?

</table>

PROPOSED EVALUATION PLAN

- Data analysis and interpretation of key indicators
- Evaluation of project impact on health outcomes

When and how will the project be implemented?

- Phase 1 (Aug 2015 - Dec 2014)
- Phase 2 (Jan 2015 - Mar 2015)
- Phase 3 (Jan 2016 - Dec 2016)
