Research Career Development Fellowships

Applications are invited for five Research Career Development Fellows to join the Warwick Integrative Synthetic Biology centre in the following research areas:

**Ethical, Legal and Societal Aspects of Synthetic Biology**
1 x 3-year Fixed Term Position, salary: £28,695 - £37,394

**Synthetic Biology – Experimental or Theoretical**
4 x 4-year Fixed Term Positions, salary: £28,695 - £37,394

Candidates will possess a PhD in a relevant discipline and have a range of applicable research skills and expertise. They will be able to demonstrate a developing track record in delivering excellent research that results in high quality outputs, such as peer-reviewed publications or grant funding.

The **Warwick Integrative Synthetic Biology** (WISB) centre delivers an integrated, internationally leading programme of research, innovation and training for synthetic biology. The centre’s state-of-the-art technology platforms and infrastructure support researchers to deliver an ambitious programme of theoretical and applied research.

WISB currently comprises more than 20 academic group leaders (associated with the Schools of Life Sciences, Engineering, Chemistry, Computer Science, Law and the Centre for Education Studies) and 16 postdoctoral scientists, together with a growing community of PhD students.

Delivered in collaboration with international partners, WISB’s integrated research themes address specific, industrially relevant design challenges across the scales of biological organisation: genetic circuits, pathways, and multi-cellular systems. WISB is committed to responsible research and innovation and our programme also explores the related ethical, legal and societal aspects of synthetic biology.
