

Media Alert: amp Trillium to Host Grand Opening of Public-Access CNG Station in Dalton, Georgia

DALTON, GA - Nov. 10, 2015 - amp Trillium, LLC, the joint venture between [ampCNG](#) and [Trillium CNG](#), will host a grand opening of its new public-access CNG station in Dalton, Georgia on Friday, November 20 at 10:00 a.m. The station, which is now fully operational, marks ampCNG's 23rd public-access CNG station in the country. The company also has stations in nearby [Perry, Georgia](#), and [Newport, Tennessee](#).

With Trillium CNG's proprietary fast-fill hydraulic intensifier compressor (HY-C), the station enables three Class-8 trucks to fuel simultaneously at 10 diesel-gallon-equivalents per minute. Dalton, a major U.S. manufacturing hub and key gateway between Atlanta and the Midwest, is an ideal location for a CNG station. Not only will the station help the many local manufacturers meet their supply chain sustainability goals, but it will also serve CNG-powered trucks traveling along I-75 in Georgia, a major U.S. freight corridor.

Tentative Itinerary

About ampCNG

ampCNG is on a mission to displace liquid fuels with compressed natural gas by building and owning ultra-fast-fill CNG fueling stations for long-haul truck fleets across the United States. Based in Chicago,

the company is building a nationwide network of CNG stations to supply major businesses and fleet operators with cost-effective, clean compressed natural gas. ampCNG is a member of the Department of Energy's [National Clean Fleets Partnership](#), which works with large private fleets to cut petroleum use and reduce the nation's dependency on imported oil. For more information, visit www.ampcng.com

About Trillium CNG

Trillium CNG is a leading provider of CNG to fleets and also offers complete facility design, construction, operation and maintenance services with the focus on fueling heavy-duty fleets that require high-performance solutions. For more information, visit www.TrilliumCNG.com. Trillium CNG is a business unit of [WEC Energy Group](#) (NYSE: [WEC](#)). Follow Trillium CNG on their [blog](#) as well as on [Twitter](#), [LinkedIn](#), [Facebook](#) and [YouTube](#).

About amp Trillium, LLC

amp Trillium is a joint venture between ampCNG and Trillium CNG formed in 2012 to build a network of CNG stations across the U.S. that serve the commercial trucking industry.
