- Parabens (harsh chemical or any Harsh preservatives)
- Xenoestrogens
- Diethanolamine (DEA)

Sunscreens are suppose to protect your skin from the sun's harmful rays. However, the very ingredients that offer sun protection have been found to have adverse health effects. The greatest rise in melanoma has been experienced in countries where chemical sunscreens are heavily promoted.

Using our chemical-free sunshield will not only protect you from the sun's harmful UVA and UVB rays, it will not cause adverse health effects like the sunscreens containing harsh chemicals.

What is the best sunscreen?

Overall the safest and most effective sun protection come from

zinc and/or titanium based sunblocks. The ideal sunscreen blocks both UVA and UVB, is stable and doesn't break down in the sun, and doesn't get absorbed through the skin.

"....after losing my brother (only 24 yrs) in a short 3 months to malignant melanoma skin cancer, I became very aware of the reality of "sun care," and lack there of. It didn't make sense in using chemicals to prevent skin cancer only to get another kind of cancer the abundance of chemicals.

In honor of my brother, a strong mission, and the help of an extremely reputable lab with richly educated chemists, GOOD DAY, SUNSHINE was born."

FACT: Only 8 Percent of all Sunscreens are Safe and EffectiveKasia Sunshield is one of them.

ChemicalFree Ingredients:

Active Ingredients: Titanium Dioxide 5% Zinc Oxide 5%

Inactive Ingredients: Triple Purified Water/Aqua, Aloe Barbadensis (Aloe Leaf) Gel, Vegetable Glycerine, Cucumis Sativus (Cucumber) Fruit Extract, Chrysin, Palmitoyl Oligopeptide, Hydroxysuccinimide, Palmitoyl Tetrapeptide-3, Palmitoyl Pentapeptide-3, Persea Gratissima (Avocado Seed) Oil, Simmondsia Chinensis (Jojoba Seed) Oil, Vitis Vinifera (Grape Seed) Oil, Vegetable Glycerine, Capric/Caprylic Triglycerides, Butyrospermum Parkii (Shea Butter), Stearic Acid, Glyceryl Monostearate, Cyclomethicone, Tocopheryl (Vitamin E), Cetyl Alcohol, Mica.

The Way Nature Intended

FACT:

Most sunscreens also contain parabens (hormone disrupters) and synthetic fragrances (contain up to 4,000 different chemicals, and can cause allergies and asthma). Extra precaution should be taken when

applying chemical sunscreens on children as they are less able to detoxify and excrete chemicals.

Protection for Everyone.... Even if you're inside much of the day, you're exposed walking to your car, into the grocery store or into work.

Ingredients to Look For

Antioxidants and green tea extract, may boost sunscreen efficacy by protecting the skin from free radical damage.

Zinc Oxide: non-irritating; UV absorbing; anti-inflammatory; anti-bacterial; non-comedogenic

Titanium Dioxide: UV blocker; acts like a shield; noncomedogenic

Ingredients to Avoid

Avobenzone
Para amino benzoic acid
Oxybenzone...
Octyl salicylate
Cinoxate

Homosalate
More...

Protect!
Anti-Aging &
Solar Radiation:

Premature Aging....

- UVB causes Burning
- Dehydration
- Free radical damage
- Destruction of vitamins, minerals
- Heat-- depletes cell energy

Bring on the SUN Antioxidant Benefits:

- Zinc, vitamin E, calcium, magnesium, aloe and other important nutrients
- Fights free radicals leading to wrinkles, with grape seed, green tea, and other antioxidants
- Moisturizes skin to fight against skin damage caused by dehydration
- Use it every day indoors and outdoors, allows skin to repair
- Nutrients repair, protect, rejuvenate and beautify skin while in the sun!

Why add the ingredients of GREENTEA?

Numerous studies now show that green tea is a powerful antioxidant, especially used on the skin.

When applied topically, green tea is highly capable of assisting in skin damage reduction and sun radiation. In short, green tea helps protect your skin's cells by providing antioxidant protection.
