## ECONOMIC EYE ON CUBA©

March 2016

**US\$4.3 Billion In 2015 U.S. Commerce Department Licensee In Perspective- 1**  
**January 2016 Food/Ag Exports Deceased 8% Compared To January 2015- 2**  
**No Exports Of Products Authorized By 2015/2016 Initiatives**  
**January 2016 Healthcare Product Exports- 3**  
**January 2016 Humanitarian Donations- 4**  
**U.S. Port Export Data- 14**  
**Current Speaking Schedule- 16**

**US\$4.3 BILLION IN 2015 U.S. COMMERCE DEPARTMENT LICENSES IN PERSPECTIVE-**  
Creating a narrative within which the government of the Republic of Cuba is unlikely to have the capacity to participate is unproductive and potentially harmful to the United States business community.

The New York Times  
13 March 2016

*“Penny Pritzker, the commerce secretary, said the next day that her department had granted American companies billions of dollars’ worth of authorizations to do business in Cuba.”*

The New York Times  
17 February 2016

*“Ms. Pritzker said her department had acted aggressively since Mr. Obama’s December 2014 announcement to pave the way for American companies to do business in Cuba, granting 490 authorizations amounting to \$4.3 billion last year alone — a roughly 30 percent increase over the previous year.”*

For the first agricultural commodities (corn and poultry) exported (US\$4,318,906.00) to the Republic of Cuba in December 2001, United States companies were required to obtain/have a license/authorization from the Bureau of Export Administration (BXA) of the United States Department of Commerce for the exact value(s) of the product(s) to be exported to the Republic of Cuba. In 2002, the BXA was renamed the Bureau of Industry and Security (BIS).

When the government of the Republic of Cuba continued and then expanded its purchases of agricultural commodities and food products into 2002, in spite of initial statements that the 2001 purchases were to be a “one off” so United States companies were not to expect further orders, there began discussions between exporters and representatives of the BIS about opportunities to create a more efficient licensing process.

One such decision by the BIS was to permit, and then encourage, United States companies to apply for a license that would attempt to include an estimate of what potentially might be exported by the company; and licenses were to be valid for up to two years. In some instances, the export qualified under the “export exception” provision and would not require certain BIS processes. A goal was to lessen the paperwork for the BIS and the United States companies.

For example, if a United States company wanted to export corn to Republic of Cuba government-operated Empresa Cubana Importadora Alimentos (Alimport), under the auspice of the Ministry of Foreign Trade of Cuba (MINCEX), and had a contract or anticipated a contract or wanted to have all documentation necessary so the company could approach Alimport and say they were “ready to go,” the BIS encouraged the company to add to the expected or desired quantities and U.S. Dollar values. Simply put, if the reasonable expectation was to export corn valued at US\$1 million, the company would use US\$5 million or US\$10 million or US\$100 million... whatever they wanted to use.

## U.S.-Cuba Trade and Economic Council, Inc.

While Secretary Pritzker reported that the BIS issued 490 licenses in 2015 valued at US\$4.3 billion, this is not reasonably related to actual exports; many of the application values upon which the BIS licenses were based were aspirational. Would have been productive for detailed data about the 490 licenses (with company names redacted) to be available for review.

Agricultural commodity and food product exports from the United States to the Republic of Cuba for the period December 2001 through January 2016 under provisions of the Trade Sanctions Reform and Export Enhancement Act of 2000 (TSREEA) were US\$5,283,872,190.00. For 2015, the value was US\$170,670,054.00

Healthcare product exports from the United States to the Republic of Cuba under provisions of the Cuban Democracy Act (CDA) of 1992 were US\$11,043,717.00 for the period 2003 through January 2016. For 2015, the value was US\$4,896,966.00.

Humanitarian donation exports from the United States to the Republic of Cuba during the period 2014 through January 2016 were US\$5,832,280.00. For 2015, the value was US\$4,619,588.00.

Thus, the total value of reported exports from the United States to the Republic of Cuba in 2015 were US\$180,186,608.00 and in 2014 were US\$293,077,853.00; the data for each year a meaningful distance from US\$4.3 billion. In 2015, the number of companies and organizations engaging in all exports were less than one hundred; for agricultural commodity and food products, the number of exporters was approximately thirty.

There is a substantial political component, which commenced during the Bush Administration and has continued through the Obama Administration- increase the value of licenses so as to emphasize 1) The White House was authorizing/encouraging commercial activity 2) Demonstrate that United States companies were eager to engage with the Republic of Cuba and 3) Reinforce the narrative that the government of the Republic of Cuba was not engaging to the level that United States companies were desiring.

Aggressively marketing aspirational license values can create an unsustainable and, more significantly, an unattainable commercial landscape. Important to neither oversell the Republic of Cuba nor undersell the Republic of Cuba. Sell it for what it is and be reasonable and honest about the potential. This will provide value to United States companies.

**JANUARY FOOD/AG EXPORTS DECREASED 8%-** Exports of food products & agricultural products from the United States to the Republic of Cuba in January 2016 were US\$22,819,258.00 compared to US\$24,850,904.00 in January 2015. Exports consisted of frozen chicken leg quarters, frozen chicken meat, corn, soybeans, soybean oilcake, and herbicides. Exporters included: Coral Gables, Florida-based Bunge Latin America; Park Ridge, Illinois-based Koch Foods (poultry); Chattanooga, Tennessee-based Koch Foods of Chattanooga; Atlanta, Georgia-based AJC International; Atlanta, Georgia-based Intervision Foods; Salisbury, Maryland-based Perdue Grain and Oilseed; New York-based Globex International; Virginia-based Sellari Enterprises; and Massachusetts-based Grove Services.

The following contains information on exports from the United States to the Republic of Cuba- products within the Trade Sanctions Reform and Export Enhancement Act (TSREEA) of 2000, Cuban Democracy Act (CDA) of 1992, and regulations implemented (1992 to present) for other products by the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury and Bureau of Industry and Security (BIS) of the United States Department of Commerce.

The TSREEA re-authorized the direct commercial (on a cash basis) export of food products (including branded food products) and agricultural products (commodities) from the United States to the Republic of Cuba, irrespective of purpose. The TSREEA does not include healthcare products, which remain authorized by CDA.

The data represents the U.S. Dollar value of product exported from the United States to the Republic of Cuba under the TSREEA. The data does not include transportation charges, bank charges, or other costs associated with exports from the United States to the Republic of Cuba. The government of the Republic of Cuba reports unverifiable data that includes transportation charges, bank charges, and other costs.

## U.S.-Cuba Trade and Economic Council, Inc.

**HUMANITARIAN DONATIONS-** Donated items are neither included in TSREEA nor CDA calculations. These items are generally delivered to the Republic of Cuba using regularly-scheduled air charter or containers on vessels; does not include personal deliveries (by travelers on charter flights and through third countries). A substantial quantity and U.S. Dollar value of items categorized as “humanitarian” are transported from the United States to the Republic of Cuba using regularly-scheduled charter flights; thus, the information is not documented.

Donations (food, healthcare, clothing, reading materials, etc.)	
Reporting Period	U.S. Dollar Value
2016	US\$272,987.00
2015	US\$4,619,588.00
2014	US\$939,705.00

If the government of the Republic of Cuba views the changes to United States regulations as a means to influence the political process in the United States, likely will be increases in purchases of products under provisions of the TSREEA and CDA and telecommunications equipment; building materials/supplies and agricultural equipment and supplies to and through authorized entities.

**NOTE:** There are meaningful exports of products from the United States to the Republic of Cuba that remain unreported/undocumented; export channels for these exports include direct charter flights from the United States to the Republic of Cuba and third-country regularly-scheduled airlines. Products include, but are not limited to, welding equipment, power tools, electronic equipment, printers, cooking supplies, medical supplies, household implements, etc., taken as baggage (checked and carry-on) by passengers.

If the government of the Republic of Cuba permits the implementation of the changes to United States regulations, which authorize the export of products to support private enterprises/co-operatives, some of the products will be exported using channels that are subject to reporting requirements.

The government of the Republic of Cuba may determine greater leverage exists from not increasing purchasing levels as a means of encouraging impacted United States-based parties to seek further regulatory and legislative changes. Members of Congress, Governors, and other political actors will increase their visits to the Republic of Cuba as media coverage will be generous. However, if too many visitors return without commitments for purchases of products manufactured in their respective states, the media’s generosity will lessen.... as may that of the political actors and, eventually, the companies.

With Venezuela’s increasing commercial and economic challenges, the government of the Republic Cuba has less financial support, and other actors (Russia, China, Iran, etc.) do not have the focus to replace Venezuela as benefactors of significance. Thus, the government of the Republic of Cuba may be entering a period of cautiousness and a full-on re-engagement with the United States may become problematic while the policy of the government of the United States remains to seek commercial, economic and political change within the Republic of Cuba.

The primary reasons for the cumulative reduction in United States exports to the Republic of Cuba **1)** lack of foreign exchange due to commercial and economic decisions of the government of the Republic of Cuba which lessen its ability to earn foreign exchange. **2)** financial largess of the government of Venezuela lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **3)** financial largess of the government of the People’s Republic of China lessens the interest of the government of the Republic of Cuba to purchase products from the United States, regardless of cost, quality, or delivery considerations. **4)** re-emergence and/or continuation of import relationships (barter, substantial credits, political motivation) with the governments of Brazil, Argentina, Vietnam, Mexico, Spain, Mexico, Canada, Russia, Iran, New Zealand, and France amongst other countries. **5)** preference to purchase products from government-controlled entities, which provide more favorable payment terms and less publicity when payment terms are not honored, which is expected given the lack of foreign exchange of government of the Republic of Cuba. **6)** efforts (which had been successful, but had lessened in their effectiveness) by

## U.S.-Cuba Trade and Economic Council, Inc.

the government of the Republic of Cuba to increase the motivation of United States-based companies, organizations; state and local government representatives; and Members of the United States Congress to be more visible in their lobbying efforts for changes in United States policy, law, and regulations.

Government of Vietnam-operated Vinafood 1 and Vinafood 2 have provided payment terms to Republic of Cuba government-operated Empresa Cubana Importadora Alimentos (Alimport), under the auspice of the Ministry of Foreign Trade of Cuba (MINCEX), of up to two years to pay for rice (25% to 30% broken). United States producers can provide this product; payment terms, however, without the use of government programs, would be cash-on-delivery to 30 days; and for credit-worthy customers, generally not exceed sixty days to ninety days.

The reduction in exports from the United States to the Republic of Cuba is not the result of changes in payment regulations implemented by the OFAC during later years of the Bush Administration, which had permitted an expansive definition of payment terms. The payment regulations were again made expansive in January 2015.

Alimport projects that it will import food products and agricultural products valued at a combined US\$2.2 billion in 2015.

The government of the Republic of Cuba reported at Alimport purchased approximately US\$2.55 billion in food products and agricultural products in 2014 and that the country imports approximately 60% to 70% its food product and agricultural requirements.

The government of the Republic of Cuba reported spending US\$2.554 billion in 2008 to import 3.423 metric tons of food products and agricultural products. Using the actual value for U.S. Dollar food and

agricultural product exports to the Republic of Cuba, the United States was the source for 27% of the Republic of Cuba's food and agricultural product imports in 2008.

The government of the Republic of Cuba reported spending US\$1.47 billion in 2007 to import 3.423 million metric tons of food products and agricultural products. The United States was the source for 29% of the Republic of Cuba's food and agricultural product imports in 2007.

A primary reason for the increase in U.S. Dollar value of purchases in 2008 and 2007 by the government of the Republic of Cuba from United States-based companies was the increase in prices in for commodities purchased from the United States. There was a meaningful increase in the quantity of some commodities. For 2008, there was a 61% increase in the U.S. Dollar value of food products and agricultural products from the United States to the Republic of Cuba compared to 2007.

The government of the Republic of Cuba has increased and decreased the quantity and U.S. Dollar value of food products and agricultural products imported from throughout the world for the 11.4 million citizens of the Republic of Cuba. There is no verifiable data to support that the necessity of a food product ration card, issued to each citizen to provide food for a thirty (30) day period is providing food products for more than fourteen (14) days. This, despite statements by representatives of the government of the Republic of Cuba that the economy of the country has increased substantially during the last several years, due, although not officially confirmed, primarily to the financial largess of government of Venezuela and the government of the People's Republic of China.

In May 2007 and June 2007, representatives of Alimport informed representatives of United States-based companies that Alimport expected that the U.S. Dollar value of TSRA-authorized purchases from the United States in 2007 would exceed the U.S. Dollar value of TSRA-authorized purchases from the United States in 2006.

In January 2007, representatives of Alimport informed representatives of United States-based companies that Alimport would significantly reduce purchases from United States-based companies due to a lack of effort (and, presumably, success) by United States-based companies in obtaining changes to United States laws and United States regulations. Alimport continued a policy, commenced in 2003, whereby Alimport

## U.S.-Cuba Trade and Economic Council, Inc.

decreased purchases from a United States-based company if Alimport perceived a lack of lobbying for changes in United States laws and United States regulations. Throughout 2005, representatives of Alimport reported that TSRA-authorized purchases by Alimport in 2005 would be substantially less than purchases in 2004. In November 2005, a representative of Alimport reported that purchases by Alimport in 2005 would at least equal, but were expected to exceed TSRA-authorized purchases by Alimport in 2004. The representative of Alimport reported that the purchase values included transportation charges, bank charges, finance charges, and other costs, which are not verifiable.

**U.S. PORT DATA-** Exports from the United States to the Republic of Cuba under provisions of TSREEA or CDA are transported from the United States to the Republic of Cuba by air or by water. There are fifty (50) districts in the United States. If the reporting district is Mobile, Alabama, the

# U.S.-Cuba Trade and Economic Council, Inc.

shipping ports include Mobile, Alabama; Pascagoula, Mississippi; and Gulfport, Mississippi. If the reporting district is Miami, Florida, the shipping port does not include Miami, Florida, but does include Jacksonville, Florida, and Port Manatee, Florida; and can include airline charter/cargo from Miami International Airport. New York reporting district includes ports in New Jersey; and can include John F. Kennedy International Airport (charter flights). Buffalo, New York, reporting district means products were transported by ground and then to the Republic of Cuba. Los Angeles, California, reporting district means that some the products were transported through Los Angeles International Airport (charter flights).

Districts From Where TSREEA Products Exported				
<b>Pork</b>	Miami, FL			
<b>Chicken</b>	Miami, FL	Mobile, AL	New Orleans, LA	Tampa, FL
<b>Turkey</b>	Charleston, SC			
<b>Corn</b>	New Orleans, LA			
<b>Soybeans/Soybean Flour</b>	Norfolk, VA	Savannah, GA		
<b>Breads/Biscuits/Cookies</b>	Houston/Galveston TX	Miami, FL		
<b>Soups</b>	Houston/Galveston TX	Miami, FL		
<b>Soybean Oil Cake</b>	New Orleans, LA	Savannah, GA		
<b>Animal Feeds</b>	Buffalo, NY	New Orleans, LA	Tampa, FL	
<b>Herbicides</b>	Laredo, Texas			
<b>Fresh Fruits</b>	Miami, FL
