An aerial photograph capturing the stark contrast between a modern, planned urban development and an adjacent informal settlement. On the right side, a multi-story white building features curved balconies, each with a small, private swimming pool. In the center, a well-maintained green tennis court with white lines is visible, with a few people playing. Above it, a large, irregularly shaped swimming pool with blue water is surrounded by a stone deck and some trees. To the left, a narrow, unpaved alleyway runs alongside a dense cluster of small, makeshift structures with corrugated metal roofs. The overall scene illustrates the 'uneven growth' mentioned in the title.

UNEVEN GROWTH

Tactical Urbanisms
for Expanding
Megacities

How can we address the rising social and spatial inequality produced by an ever-growing planetary urbanization? On the occasion of a major exhibition at The Museum of Modern Art, this publication brings together three approaches to this crucial issue: critical essays by key authors in urban thinking today, including David Harvey, Saskia Sassen, and Ricky Burdett; highlights from an ongoing participatory survey on tactical urbanisms around the globe; and new design scenarios for the future of six world megacities—Hong Kong, Istanbul, Lagos, Mumbai, New York, and Rio de Janeiro.

Uneven Growth: Tactical Urbanisms for Expanding Megacities is the third project in MoMA's Issues in Contemporary Architecture series, following *Rising Currents: Projects for New York's Waterfront* (2010) and *Foreclosed: Rehousing the American Dream* (2012).
