Interested in a career as a communication designer, art director, illustrator, concept artist, or interactive designer (to name only a few possible careers)?

The Bachelor of Design in Visual Communication is a new 4-year degree program with exciting career outcomes for a new generation of creative professionals. The degree replaces, and builds upon, the successful IDEA diploma program, which has gained a reputation throughout Canada for effective, industry-ready graduates. New for the degree are options to specialize in branding, illustration or interactive design beginning in third year, and a three month practicum in fourth year.

Bring your portfolio to our Portfolio Workshop for a friendly critique from our instructors, and find out more!

Note: Events have specific start times - don't miss the Information Session at 1:00 p.m!
