### The Self-Fabric Bra Clasp

*Designed and drafted by Kat Klebenow*

**Key Notes**

- Cut amount required from both main fabric and interfacing.
- Cutting grainline/DOGS will depend on fabric. Place more stable direction horizontally if possible (DOGS vertical).
- For Bra Eye Back, Cut 2 of each if you wish to add the false back.
- 1/2" seam allowance included as shown, if you wish to go down to 1/4" to reduce thickness, do not reduce the edges marked with a lime green line (these areas are required to attach to bra).
- Position where interfacing should be fused is also demonstrated here.

**Notes**

<table>
<thead>
<tr>
<th></th>
<th>Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cut from main fabric</td>
<td></td>
</tr>
<tr>
<td>Cut from interfacing (and optional stabilizer)</td>
<td></td>
</tr>
<tr>
<td>(3.5&quot;) - the x-height demonstrated for the 3-hook clasp in my post</td>
<td></td>
</tr>
<tr>
<td>-scale of grid squares is 1/4&quot;</td>
<td></td>
</tr>
</tbody>
</table>
