

Adult Athletic League Coordinators

Purpose of the Ministry: SPLC Adult Athletic League activities are provided to encourage Christian fellowship among our adult members (age 18 and above). This ministry contributes to our church mission of leading people to a full life in Christ ... by helping them to better know each other and interact in a Christian setting.

Ministry responsible to and supported by: The St. Peter staff person who provides support for this ministry is Allie Bickel, Assistant to the Senior Pastor.

The Ministry Coordinators are:

- Volleyball League- Brittany Koester
- Basketball League- Bob Terrell

Job duties: The coordinators are responsible for publicity, scheduling the MAC for games, scheduling games and coordinating League members and referee assignments.

These games are conducted in an atmosphere of friendly competition, where the focus is on fun, fellowship and exercise! Volleyball teams are mixed, male/female and ages.

Time requirement: Coordinators spend a few hours per month during the season organizing this activity.

Volleyball season starts in early February, ending in early May. Games are played on Sunday evenings, in the MAC, from 6 to 8 PM. Games are played on Sundays, in the MAC, at times best for MAC availability and member participation.

Basketball season follows a similar plan, with games played on Sunday afternoons, also in the MAC. No formal teams are formed, it is a 'pickup game' activity. Participants can come every week or just when they can. No reservations are needed.

Length of commitment: There is no required commitment, but a commitment through a full season is helpful.

Training: Training is generally provided by previous coordinators.

Skills and qualifications needed for leaders: There are no special skills required and the only qualification is a desire to plan the activity and help our members have fun, fellowship and exercise at the same time.

Benefits to the volunteer: Helping our church members to enjoy fellowship, and exercise, together is a rewarding experience.
