

the **E**vil **B**ean

For optimal extraction,
maintain a water temperature
between 195 and 205 degrees F.

a reasonably thin-walled cup,
light in weigh but of sufficient
thermal isolation, is desirable.

Proper emulsification of
water and oil produces
the ideal "Crema" or foam.

According to a
survey by
Reuters*,
Chicago ranks
as the most
caffeinated
city in the
U.S.
