## **Home Energy Audit**

## **Is Your Home Energy Efficient?**

One of the best ways to check if your home is using energy wisely is to complete an **energy audit**. Answer the questions below and tally up your points!

1.	Refrigerator	4.	Thermostat
	Close your fridge door over a piece of paper		Your home's thermostat is set to:
	so it's half in and half out of the fridge. Try		$\Box$ 72 degrees or higher (0 pts)
	and pull the paper out. Is it:		☐ 69-71 degrees (2 pts)
	☐ Easy to pull out (1 pt)		☐ 68 degrees or lower (4 pts)
	☐ Hard to pull out (2 pts)	5.	Electricity Load
	☐ Doesn't pull out (4 pts)	٥.	Take a look at your home's appliances, and
2.	Furnace Filters		check all that apply:
	Ask your parent how often your home's		$\square$ Computers are turned off (1 pt)
	furnace & indoor air filters were cleaned or		☐ We have at least one ENERGY STAR
	changed in the last year. How many times?		appliance. (2 pts)
	$\square$ 0 times (0 pts)		$\square$ Water heater is set to 120° or
	$\square$ 1-3 times (2 pts)		lower. (3 pts)
	☐ 4 + times (4 pts)	6.	Windows
3.	Light Bulbs		What kind of windows do
	Count how many LED light bulbs you have in		you have at home?
	your home. Do you have:		☐ Single-pane windows (0 pts)
	☐ 0 LED bulbs (0 pts)		☐ Double-pane windows (2 pts)
	☐ 1-4 LED bulbs (2 pts)		☐ Triple-pane (4 pts)
	☐ 5 + LED bulbs (4 pts)		
	My Score:	-	How did you do?

**0-10 Points: Your home may not be using energy efficiently.** How can you improve your score?

19-26 Points: Congratulations! Looks like your home is pretty energy efficient!

11-18 Points: You're getting there. Your home is saving energy, and could save more.
