

## ***Be-Green Bugs can help remind us to live greener!***

### ***Here's how! . . .***

2. **MAKE** a Be-Green Bug. Use recycled materials from around the house, or do a scavenger hunt outdoors to find sticks, rocks, and other natural items to use.
2. **NAME** and Befriend your Be-Green Bug. Introduce him or her to friends and family! Encourage & help others to make their own.
3. **THINK** about ways your Be-Green Bug can help you live greener. Do you forget to turn off the lights before you leave your room? Leave your Be-Green bug near the light switch to remind you next time and every time! Forgetting to turn off the water when you brush your teeth? Sit Be-Green bug on the sink as a reminder to conserve water when brushing. Think of other ways he/she can help!
4. **SHARE** your Be-Green Bug with others! Loan him to a sibling who needs help remembering to do a be-green habit – or to a parent, grandparent, or neighbor!

## ***Be-Green Bugs: BLOCK PARTY IDEAS!***

**Bug-Making Workshop.** Gather some fun recycled items and get together with neighbors indoors or out to make at least one Be-Green Bug for every house on the block! Follow “bug” instructions on flip side to help everyone live greener.

**Scavenger Hunt.** Hide some Be-Green Bugs outdoors. Whoever finds one can keep it for a week, following the instructions on the flip-side to help them live greener. Have another scavenger hunt to move Be-Green Bugs to new “owners” for a different week.

**Sign up/Share Out.** Have a Be-Green Bug you would like to loan out to help your neighbors live greener? Invite them to sign up to borrow it for a week, and give them ideas of how they can use it.
