

# IN THE SPOTLIGHT...

## SEPTA Grants in Action

Hemlock School asked SEPTA for funds to purchase "Code and Go Robot Mouse!" to enhance the coding initiative in kindergarten. These amazing mice are so much fun to program. The students have been so successful in getting the mice to navigate the maze and find the cheese. Next steps for our young programmers: "Read" the steps in the program and have the mouse follow the directions. After that, they will create their own puzzles for their classmates. Under the capable direction of **Ms. Romina Groisman**, our computer aide, the children have truly embraced the technology. **Thanks to SEPTA's generosity, each class has two kits and two additional mice in the classrooms.** These mice are very welcome at Hemlock!
