The 30/30 Project envisions a world in which healthcare is a human right. Our mission is to increase healthcare access worldwide by providing healthcare infrastructure for communities that lack medical service. Our goal is to construct 30 healthcare projects worldwide that are built to such rigorous standards, that they stand for at least 30 years.

The 30/30 Project is a five-year initiative of Construction for Change, a registered 501(c)(3).
