

RTSOPS 2013

The 4th Real-Time Scheduling Open Problems Seminar

July 9 2013 - Paris, France

(held in conjunction with ECRTS 2013)

Call for Papers

RTSOPS 2013

<http://www.rtsops.org/>
July 9, 2013

Deadlines: None!

Submissions welcome until
10 papers are accepted.

Seminar Co-Chairs

Liliana Cucu-Grosjean
- INRIA Nancy Grand-Est
Sathish Gopalakrishnan
- Univ. of British Columbia

Program Committee

Sebastian Altmeyer
- Univ. of Amsterdam
Marko Bertogna
- Univ. of Modena
Vincent Nelis
- CISTER/IPP-HURRAY

Steering Committee

Nathan Fisher
- Wayne State Univ.
Robert Davis
- Univ. of York
Liliana Cucu-Grosjean
- INRIA Nancy Grand-Est
Gerhard Fohler
- TU Kaiserslautern

The 4th International Real-Time Scheduling Open Problems Seminar (RTSOPS 2013) provides a venue for the exchange of ideas and the discussion of interesting unsolved problems in real-time scheduling. The format of the seminar encourages interaction between participants and provides ample time for relaxed discussions. The goal of the seminar is to promote a spirit of co-operation and collaboration within the real-time scheduling community.

RTSOPS 2013 is organized around presentation and collaboration sessions. Each presentation session provides the opportunity to hear about a number of unsolved problems in real-time scheduling, highlighted via brief presentations. The following collaboration session gives participants the opportunity to interact in small groups, exchange ideas with the presenters, explore how the problems might be solved, and take the first steps towards a solution. In addition, authors of open problem submissions from previous years' RTSOPS are invited to submit short status reports on progress made towards a solution to their open problem. This year's seminar will include a session for presentation of such advances.

Extended abstracts (for either new open problems or status reports on previously-presented problems) for RTSOPS 2013 must be written in English, and not exceed two A4 pages in length in single column, 10pt format, including relevant references. The main purpose of the abstract for new open problem submissions should be to provide a clear description of the problem. Abstracts may be submitted describing well-known but as yet unsolved problems. However, all abstracts should contain some element of original work that has not been published before; for example, a new problem, a new way of looking at an existing problem, new intuition or ideas on how a problem might be solved, possible frameworks for solutions, or overviews of special cases that may be useful in solving a problem. Abstracts describing progress on an open problem presented at previous RTSOPS meetings should include a brief statement of the open problem and a description of the technical advances made towards a solution.

Abstract submissions should be made electronically, in PDF format, via the paper submission page for RTSOPS 2013:

<https://www.softconf.com/e/rtsops2013/>

RTSOPS 2013 will use rolling notifications of acceptance. There is no explicit paper submission deadline but submissions will stop being accepted after ten papers are accepted. The notification of acceptance/rejection will be sent to authors no later than three weeks after submission.
