

PRESS RELEASE

LEKI'S FREERIDE POLE & GLOVE COMBO

LEKI'S Blue Bird Vario pole (£99.95) has been built for versatility and designed from 'grip to tip' to offer you a ski pole that is fast and simple to adjust as well as comfortable and reliable. When teamed with the Leki Elements Platinum S glove you have the perfect combination for lots of freeride fun this season.

Thanks to Leki's innovative external adjustment Speed Lock 2 system (TUV-Sud Certified) the Blue Bird Vario is easily adjustable from 110cm to 140cm to suit all types of terrain and snow. The 16mm upper shaft is made of high-strength durable aluminium and the slim 14mm lower shaft is made of carbon.

Sophisticated in design it comes equipped with a deep-snow basket for optimum freeride use. The poles Trigger S release system allows for maximum security and comfort on the slope and the patented safety release offers additional protection against injury.

Team the Leki Blue Bird Vario with Leki's Elements Platinum S glove (£119.95) complete with Trigger S loop that can be easily clicked in and out of the Trigger S grip on the pole. This glove is made from smooth premium goatskin and comes in funky lime-black, cyan-black or black colourways.

The more generous Comfort Fit Cut makes these gloves extra comfy and guaranteed to keep your hands warm. The long Neoprene cuff with Velcro fastener makes this glove ideal for on-piste as well as off-piste activities. The specifically designed Silicone points on the palm also offer essential grip.

About LEKI: LEKI specialises in making poles – ski poles, trekking poles and nordic walking poles as well as associated accessories. For over 60 years, outdoor enthusiasts have appreciated the quality, value and innovative technology that goes into the products. Every pole is manufactured by a skilled and dedicated workforce in LEKI's own eco-friendly production facility in the heart of Europe. Any other pole is just a stick.
