Rev. Terri Girardi

Rev. Terri Girardi's Bio - "As a child I had a curious fascination with Spiritualism. Being raised as a Catholic I knew of no other belief outside of the Catholic Church, moreover, that Spiritualism was being practice throughout the world. I assumed what I was experiencing was indigenous to me. Unlike other children I was a seeker for answers to all the Universe's mysteries. My passion, my insatiable quest for answers to life carried in to my adult life. Along my path I studied Spiritualism, the world's religions, New Thought, Religious Science, Science of Mind and many more inspiring and interesting concepts of life and creation. I believe in the Spiritual realm that consists of the mind, soul, and the mysteries of the universe. Through Spiritual Guidance I have gained wisdom, knowledge and experiences, the tools needed to inspire people to successfully find their true calling." More About Rev.
