ABOUT UDL IRN

The Universal Design for Learning Implementation and Research Network (UDL IRN) is a grassroots organization that supports the scaled implementation and research related to Universal Design for Learning. Through collaboration, we support and promote the identification and development of models, tools, research, and practices designed to foster effective UDL implementation in educational environments. We encourage and welcome participation in these discussions.

Tired of attempting to wrangle random acts of improvement? Looking for ways to effectively and efficiently design high-quality learning for all? Use Universal Design for Learning guidelines to transform your learning environment.

This special event is sponsored by three Michigan Intermediate School Districts and the UDL-IRN. Participants will learn about UDL implementation from experienced UDL teachers, coaches and administrators. With the support of UDL practitioners, individual participants and school teams will have the opportunity to deepen their UDL knowledge and construct an effective implementation plan. Educators, school leaders, instructional coaches, teacher educators, and researchers interested in UDL implementation should attend.

MONDAY, OCTOBER 23, 2017

Join us for a comprehensive immersion into the principles and practices of UDL. You'll learn effective implementation strategies from national UDL leaders and experienced local practitioners. Leave with the resources you need to begin UDL implementation in your school.
