Awning

- Crank outwards from bottom.
- Provide ventilation and shield from weather.
- Draw more air out than in – ideal for humidity control in kitchens and bathrooms.
- Duraco awning windows have a unique locking system making them extremely secure and energy efficient.
- Awning windows can be joined with a variety of operating or fixed window combos and all come with the Duraco “clean screen”.
- Duraco windows are dual or triple glazed with ½” airspaces for optimum energy efficiency.

Casement

- Casement windows open outwards from the right or left side allowing you to control the volume of air circulation.
- Casement windows can be opened to a full 90° for easy cleaning and come with the Duraco “clean screen”.
- Casement windows offer the best ventilation and best energy efficiency.
- Duraco windows are dual or triple glazed with ½” airspaces for optimum energy efficiency.

VERTICAL SLIDER

HORIZONTAL SLIDER

Vertical Slider & Horizontal Slider

- Built with operating sashes that glide to the left or right (horizontal) or bottom to top (vertical) sliders.
- Duraco sliders feature a heavy duty sash with smooth running rollers providing durability and easy operation.
- Vertical Duraco sliders feature spiral sash balances and a stay in place feature that allows the window to stay where it has been opened to.
- State of the art engineering allows for easy cleaning and ensures years of carefree enjoyment.

Picture & Fixed

- Picture windows are direct set and meant to provide an unobstructed view of the outdoors by maximizing the glass area.
- Picture windows are often used in combination to create large windows.
- Fixed windows like Picture Windows are non-opening.
- Fixed windows are used when combining with operating casements or awning windows to create an even sight line.

PICTURE

Duraco Windows designed to let in more natural light, provide better ventilation, operate easily, act as emergency exits and enhance the architectural style of your home. **Duraco windows are guaranteed for life.**

BAY

BOW

Bay & Bow

- Bay or Bow windows can be a combination of casement, picture, fixed and/or sliders.
- Bays and Bows transform any area – the extra amount of natural light brightens even large rooms and gives small rooms a more spacious feeling.
- Duraco Bay and Bow windows are customized to your specifications and built at any angle to suit your requirements.
- Duraco Bay and Bow windows are available with an optional head and seat, allowing you to convert the window into a spot for lounging.

Dead Air is the most efficient insulator. **Duraco Windows** are engineered to trap **Dead Air** in the 3 channel hollow core profile.

Dead Air works with the very low conductivity of PVC to produce extremely energy efficient windows and doors.

Duraco Windows exceed the highest Energy Star Standards.
