Introduction

Lars Albinsson is an internationally recognized creative process consultant, who organizes and leads large-scale innovation/design efforts. Having worked for companies like IKEA, Volvo & Microsoft, he was engaged by LKAB for the relocation of the two mining cities Kiruna and Malmberget in Sweden. His work there included leading the development of a concept and master plan for a new city. Lars approach to processes is unique in engaging lots of stakeholders, for instance 10% of all citizens in Malmberget, and integrating many experts, engineers, designers and architects from different fields.

Lars is also an award-winning researcher at Linköping University and the author/co-author of more than 20 articles and three books on design processes.

He lives with his family in Vaxholm, the capital of the Stockholm archipelago.
