TRAINING and PRACTICAL GUIDANCE

Trusted CI provides the NSF community with practical cybersecurity guidance, including development of cybersecurity programs, identity management, incident response, and secure coding — all in the context of scientific research.

MISSION

Trusted CI’s mission is to provide the NSF community a coherent understanding of cybersecurity’s role in producing trustworthy science and the information and know-how required to achieve and maintain effective cybersecurity programs.

ENGAGEMENTS

From quick questions to collaborative engagements lasting months, we tackle challenges of all sizes. Trusted CI assists with anything related to cybersecurity for NSF projects and facilities.

How to get help:
- Email ask@trustedci.org (please identify which NSF project your query relates to)
- Submit our web-based contact form at trustedci.org

NSF projects are also welcome to join our email lists and ask questions of Trusted CI staff and other projects there. If you are in the proposal-writing stage, please visit “Including Trusted CI in a Proposal” on trustedci.org.

MONTHLY WEBINARS

trustedci.org/webinars

Trusted CI webinars extend the reach of our cybersecurity services for the NSF research community. Upcoming topics appear on our blog, and recordings are available on our website. If you have questions or comments after a webinar, feel free post to the discussion mailing list.

COMMUNITY RESOURCES

Trusted CI maintains several email lists for timely news and vulnerability awareness, an extensive cybersecurity program guide, and specialized overviews of key topics (e.g., identity and access management, software assurance).

NSF CYBERSECURITY SUMMIT for LARGE FACILITIES and CYBERINFRASTRUCTURE

Each year, Trusted CI hosts the NSF Cybersecurity Summit for Large Facilities and Cyberinfrastructure. This summit serves to build a trusting, collaborative community working to address core cybersecurity challenges in support of NSF science. The event is open to NSF projects and facilities. Invited attendees include cybersecurity practitioners, technical leaders, and risk owners from within the NSF Large Facilities and CI Community, as well as key stakeholders and thought leaders from the broader scientific and information security communities.
