TO WHOM IT MAY CONCERN:

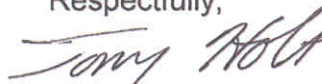

Coatings Application & Waterproofing Company comes highly recommended for contractor services in coatings and roofing applications.

They have completed many projects in our wet milling industry plant over the past many years. We have found the quality of their work and their expertise in the field to be of the highest nature.

I have personally worked with Brian Weldon, CAW Supervisor, on several of the different projects and found him to understand the need to complete jobs in an efficient and timely manner.

Please feel free to contact me if you have any questions. Thank you.

Respectfully,

A. "Tony" K. Holt
Project Coordinator
