

“ The younger the victim,  
the more likely the abuser  
is a family member.

**50%** of those molesting a  
child under 6 were  
family members.

**23%** of those abusing a  
12–17 year-old  
child were family  
members. ”

*(Snyder, 2000)*

**Educate your child in Body Safety  
from as young as 2 years old.**
