WIRE STRIPPING

FINALLY A NEW CONCEPT IN A CABLE AND WIRE STRIPPING TOOL

The **STRIP-ALL** is a compact, ergonomically designed labor saving tool. It makes it a cinch to strip the jacket of cables such as: plenum, computer & communication, line cord, Romex®/NM (flat or round), coax, Category 5 plus many more! Ring and straight cuts are easily accomplished on a multitude of cables from 1/4" to 7/8" O.D. A handy built in wire stripper eliminates the need to reach for another tool. Use the folding knife blade to quickly cut off the Romex® jacket and paper filler. Very safe, easy to use, high quality tool. The **STRIP-ALL** will give you years of service and you'll be wondering how you ever got along without it!

- **STRIP-ALL** straight cuts cables from 1/4" to 5/8" (6mm to 15mm) & ring cuts up to 1/2" (12mm). For larger cable use the **SA-200L** which has an extended range from 3/8" to 7/8" OD. (10mm to 22mm)
- Equipped with an extra sharp blade cartridge which easily slices through cable jackets. Extremely accurate, the **STRIP-ALL** prevents damage to conductors by setting the micrometer dial to the correct depth.
- Built in wire stripper and folding utility knife blade on select models.
- Includes a spare blade cartridge inside top housing. Blade cartridges are easily replaced by simply removing one phillips head screw.
- The **SA-200-UR** is the perfect tool for datacom work. It has a crimper for UR, UY and UB connectors. Also cut 18-26 AWG wires with the built in wire trimmers.
- Every **Strip-All** (except SA-200L) now includes **A-201 Adapter** to strip & ring cut cables as small as 1/8", such as Cat. 5 & datacom.
