**CUTS VIRTUALLY ANYTHING PERFECTLY SQUARE**

The labor saving **Swing-Saw** is a clever handheld combination **vise and hacksaw**. The top lever is moved back and forth and the body of the **Swing-Saw** is squeezed clamping the vise on both sides of the part. Maximum vise opening is **1-1/2"**.

Unlike a conventional hacksaw and vise, the **Swing-Saw** has a **six to one leverage advantage**, providing strong cutting action. The **Swing-Saw** makes a **perfectly square cut every time!** You can start a cut exactly where you want, no more skidding all over the part with a hacksaw blade or jumping out of a cut already started. Best of all cut or nicked fingers are a thing of the past!

**CUT ALMOST ANYTHING! EVEN SQUARE TUBING!** The **Swing-Saw** is not limited to the cutting of tubing. As a matter of fact, metal or plastic extrusions, shelving tracks, storm window frames, flexible conduit, AC cable, hoses, threaded rods and bolts, molding and wood dowels, can be cut efficiently by this hand tool with a **minimum amount of burrs**.

**CUT ANY OF THESE SHAPES PLUS MANY MORE!**

Order: B-109-18 Blade for thick wall tubing  
B-109-24 Blade for thin wall tubing and metal hose

**2nd Prize!**  
**International**

**Cat. SW-130**

- **CARRY IT ANYWHERE!** The **Swing-Saw** body can be latched & the handle folded for compact storage. This rugged tool weighs less than two pounds and is always ready when you need it - especially handy on a ladder!

- Convenient - easy to make a square cut without a vise!
- America design with Swiss Army Knife quality & ingenuity
- Main body and jaws made of hardened steel for long life. Hardened captive spring loaded retaining pins for easy blade changing. Die cast top housing. Weight: 2.5 lbs., 9-1/2" long

### Maximum Vise Opening

Round material: 1-1/2 Dia. (38mm)  
Square: 1.0" (25mm)  
Rectangular: 3/4" x 1-1/2" (19 x 38mm)
