No Floor Area in any residential zone shall exceed 15,000 square feet.

**For lots larger than 3 acres barns and agricultural related buildings
are excluded from floor area ratio calculations**

HOW TO DETERMINE THE FLOOR AREA RATIO
FROM THE ADOPTED FAR TABLE

1. Find the two numbers on the chart the lot size falls between.

Actual lot size = _____ square feet (SF) NET AREA
Falls between _____ and _____

2. Subtract lower lot size square footage from actual lot size square footage.

_____ Actual net lot size square footage
- _____ Lower lot size square footage

_____ square feet = THE PERCENTAGE FOR STEP #5 (3 decimal places)

3. Subtract the lower MAX FAR SF from the Table from the upper MAX FAR SF to get the Multiplicand

_____ FAR = _____ sf Upper MAX FAR SF
_____ FAR = _____ sf Lower MAX FAR SF

Multiplicand = _____ sf

4. _____ is the MULTIPLICAND

5. Use PERCENTAGE FROM STEP # 2 _____

6. Multiply the MULTIPLICAND by the PERCENTAGE

_____ x . _____ = _____ square feet

7. Add results of # 6 to the Lower MAX FAR SF

_____ + _____ = _____ (FAR for net lot size)
