

PROMS 2.0 Case Study Feedback

Your name & title	Daniel Conway
Organisation	Central Manchester Foundation Trust
What intervention(s) are you using PROMs for?	Prostate cancer Resection
Can you list some of the benefits you have experienced since implementing PROMs?	<ol style="list-style-type: none"> 1. Better understanding of Prostate Patient Pathway 2. Engagement with patients outside of clinical consultation 3. Using electronic communication to collect and distribute information 4. Improved understanding of appropriate scoring systems to monitor post-operative recovery
How did you and your team cope with adopting the PROMs system? Please make reference to the training, implementation, support etc.	We benefitted from support of the central team (Amy) Some useful communication between Trust IT and Bluespier Regular meetings with other sites across the region have highlighted the benefits of using PROMS within other specialities eg. orthopaedic, trauma.
How did your patients cope with adopting the PROMs system?	Till now we have been using paper forms and uploading the data on the PROMS 2.0 database by hand. We have now acquired hand-held devices and we are hopeful that we would be able to use them with patients in the near future, as PROMS

	2.0 system has not improved over last months with being more user-friendly.
Have you experienced any cost savings since using PROMs? E.g a reduction in outpatient appointments.	No. At the moment, we have just started to collect PROMS 2.0 at 6 month in the pilot study.
Do you have any stats or data on this you can share?	
Any additional comments?	Thanks for the opportunity to get involved
