

# Certified Scrum Master Class

**Scrum is Simple. Doing Scrum is Hard.<sup>SM</sup>**

## Description

Scrum was designed to enable teams to achieve a hyperproductive state (5-10 times normal performance). To achieve this level of performance, essential grounding in the Scrum work management framework is necessary.

In Scrum, there are 3 roles: the Product Owner, the Team, and the Scrum Master. The 2-day Certified Scrum Master class imparts the knowledge, skills, and tools to successfully implement Scrum as a ScrumMaster. This highly interactive workshop provides a foundational understanding of the Scrum framework and gives participants hands-on practice applying Scrum in multiple project settings and situations.

## Objectives

Using a combination of interactive presentations, problem-solving exercises, and team-structured simulations, the experiential workshop enables participants to:

- Understand the core principles, strategies, and practices of Scrum
- Practice applying Scrum in multiple project settings and situations
- Cultivate the Scrum Master mindset vital to effectively managing projects and teams
- Gain skills and confidence in effectively communicating Scrum principles to managers and team members alike.

## Topics

- Overview of Scrum
- Product Backlog
- Release Planning and Estimation
- Role of the Product Owner
- Role of the Scrum Master
- Leading Self-Organizing Teams
- Sprint Practices
- Metrics and Reporting

## Who should Attend

Managers, team leads, project managers, or other team members who wish to learn how to apply Scrum principles and rules to create high performing teams focused on rapid value delivery to their customers
