MILSIM WEST INSURGENCY
VERSION 1.0

JULY 2016

DISTRIBUTION RESTRICTION:
Approved for public release; distribution is unlimited.

HEADQUARTERS
MILSIM WEST,
CHICAGO, IL
The goal of MSW INSURGENCY is to create a social war-gaming environment. This guide is to be used in conjunction with the most current version of the MilSim West TACSOP as a rulebook. MilSim West reserves the right to change any of these rules and communicate them to our participants during the event to ensure the high quality and safety of our event is maintained.
MSW Insurgency is a live action large format social war-gaming event. It differs from other MSW events in a few key ways. The most obvious are the introduction of a Citizen faction and new rules governing trade, law and politics within the game. During the first half of MSW Insurgency participants are playing a political wargame while the second half is a force on force much like the regular MSW format.

The Citizen faction is a temporary one and will at some point become part of a Militia attached to either the NATO or RUSFOR factions. Each faction will have its own Militia during MSW Insurgency which they must create and recruit from among the Citizens. The Citizens and their appointed officials, authorities and public servants have resources provided to them by MSW which makes their cooperation a key asset to either faction. The participants in the Citizen faction control both physical and manpower resources which makes gaining majority control of them an objective for both armed factions.

NATO and RUSFOR are provided Distinctive Uniform Items (DUI) by MSW for use in equipping their Militia.

The game is divided in to essentially two Phases.

During the first 24 hours of the game the NATO Provisional Transitional Authority (NPTA) drives the activities of Citizens with resource gathering, trade and political events while each armed and uniformed faction (NATO and RUSFOR) has a chance to conduct a series of Counterinsurgency (COIN) or Foreign Internal Defense (FID) missions against each other. This could include but is not limited to; Civil Affairs, Psychological Operations, Military Police Operations, Intel/Counter Intel and Special Operations style missions for subordinate units. Wearing civilian attire is authorized by commanders however if killed or captured in civilian clothes the participant may be subject to the authority of the NPTA depending on their allegiance.

The inciting event for the second phase of the game will be the National Government Election. All offices of the NPTA will be handed over to the authority of the winner of the election who will be pro RUSFOR or pro NATO. The second half of the game is essentially the normal MSW force on force format but with a Militia for both sides and starting from the point of a civil war with intervening third party nations.

The goal of MSW Insurgency is to create a complex social wargame where themes of politics and tactics entertain participants brains and trigger fingers.
• You may engage the following individuals regardless of circumstances.
  • Uniformed troops of enemy factions.
  • Enemy militia forces wearing distinct uniform items identifying themselves as such.

• The use of force, including deadly force, is authorized to protect the following:
  • Yourself, your unit, and friendly forces
  • Enemy Prisoners of War
  • Citizens from crimes that are likely to cause death or serious bodily harm, such as assault, murder or robbery.
  • Designated civilians and/or property, such as personnel of the City Hospital, Municipal Police, NATO, NPTA, or any of the NPTA Ministries or Departments.

• Any Citizen who is shot by an armed faction and “bleeds out” will immediately join the militia of the opposing armed faction. Wanton shooting of civilians will only result in more enemies.

• All Citizens of the territory governed by the NATO Provisional Transitional Authority are governed by the Criminal and Civil Code of the NATO Provisional Transitional Authority (CCCNPTA) which has severe penalties for Murder and Robbery.
GOLDEN RULE:
• Respect other participants and their property. Play with sportsmanship. Whenever in doubt about how to act or behave in any situation not specifically mentioned within this manual or the TACSOP, always use your best judgment to keep within the spirit of the event. Don’t “game” the event, go with the flow and enjoy the experience. This is a collaborative gaming experience which requires all of our best efforts for success.

ASK FOR CONSENT:
• As always ask for consent when searching. The INSURGENCY format will allow for some irregular scenarios not found in our standard force on force format. If making physical contact with someone you don’t know personally seems appropriate to you in the scenario (detaining, searching, social networking or negotiations) be sure to ask for consent from any participants you intend to make physical contact with. Any situation involving use of force or non standard physical contact (almost anything beyond a handshake) needs to be done with consent.

CHOOSE YOUR OWN ADVENTURE
• Remember you are choosing it with others. You control your story in MSW INSURGENCY but you also affect the experience of other players around you. You choose to be either a member of a military unit or a member of a Citizen community. Your choices determine what your experience will be. If you try to snowflake your unit will be less effective. If you choose to rob or murder your neighbors your time as a civilian will likely end with a public execution and no vote in the elections.

STAY IMMERSED
• This doesn’t mean maintain a shitty fake accent all weekend it means focusing your actions on achieving the goals you, your friends, your unit or ministry have set within the game. Wear the right stuff. If you are a Citizen dress as a civilian if you are in a uniformed faction adhere to their regulations in the TACSOP. Interact with people with your goals and role in the game in mind. You will get prompts from Cadre during event in processing and direction throughout the event but it’s your job to choose your own adventure. The goal of this game isn’t kill counts unless you’re counting.
