Pitsi

Harness for neonatal transport

Medical transfer - Every year, an estimated 15 million babies are born pre-term, 10% of all births, and this number is rising.

Many of them are being transferred in airplanes and ambulances to access specialized care.

Preterms and infants at risks are highly complicated client to transfer because of their instability, their tiny morphology, fragile skin and immune system. Indeed, there is a higher chance for medical complications than for accidental misfortunes.

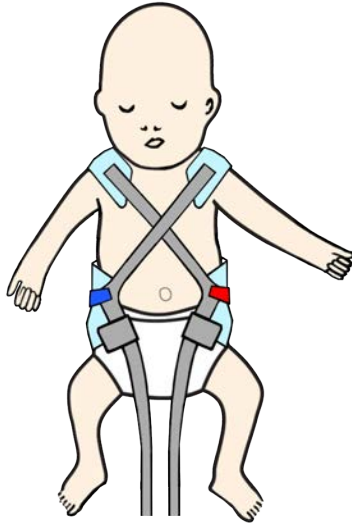

Pitsi - A harness for neonatal transport, allows a safe transport in airplanes and ambulances. Reconcile the great importance of clinical observation with on-board security.

This light and delicate restrainer promote a caring and comforting approach, Pitsi brings a medical smart solution in terms of risk reduction and a wider range of medical manipulation. It is highly adjustable and suited for every baby's morphology with quick fastening and releasing.

Compatible with Dräger TI500 transfer incubator.

Holistic approach - Pitsi is a unique product in the medical environment due to its new holistic approach for the caregiver as well as for the baby.

It demands a use of the talent and experience in positioning of the caregiver and following a sets of instructions. The combination of the tow is the key for a complete view of the situation.

A collaboration which started in summer 2013 between E.V.A.Q – Aeromedical Evacuation of Quebec, NICU CMES - neonatal intensive care unit and Linea Alba - a young and innovative Research and Development company, created a unique product for the medical world.

Since march 2014 the product was highly acclaimed by nurses, doctors and evacuation professionals.

Received the Innovation Prize, Prix Diamants, which acknowledges improvements in patient care and quality, awarded by CHU de Québec .

- Allows medical manipulation during transport
- Compatible with TI500 Drager incubators
- Reduces risk of trauma and harm when experiencing turbulence
- Fully adjustable
- 3 sizes, 500g-4.5 Kg (1lb-10lbs)
- 100% Cotton with Dacron® straps
- Easy fastening and releasing
- Light, delicate and soft

S 500g - 1.5kg

M 1kg - 3kg

L 3kg - 4.5kg
