TSX Venture: VIS

The Smart Restroom Attendant wanda

Supports up to 3 Different restrooms on One Unit

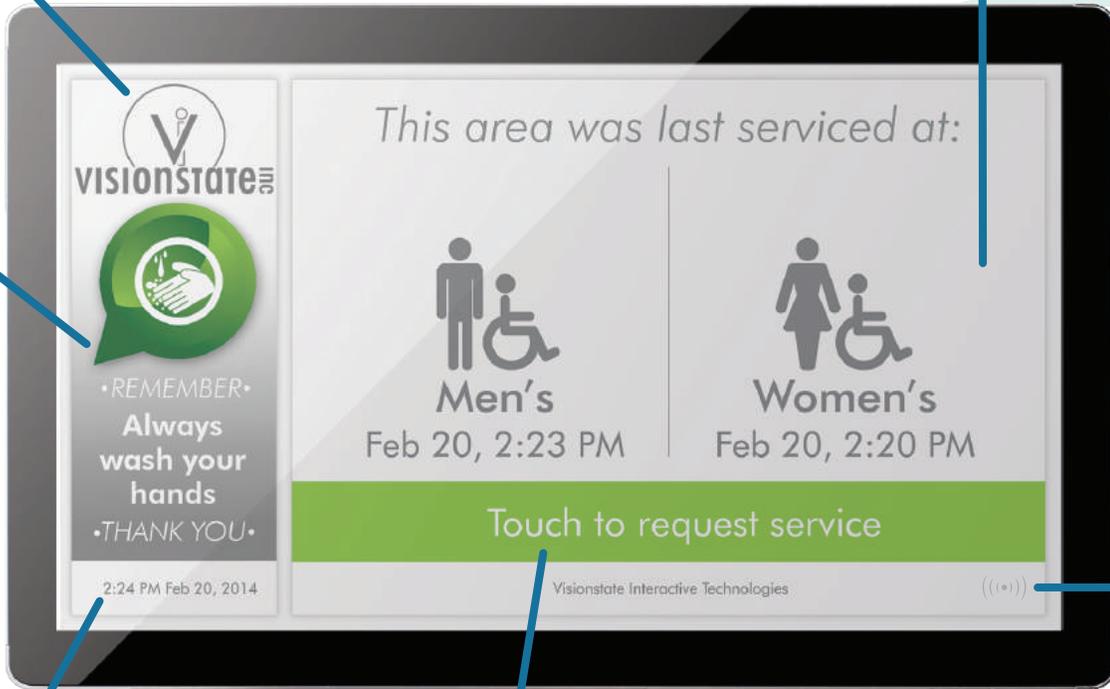

Men's, Women's, and Family restrooms share a space?
We can support all three on a single WANDA.

Customizable Logo

A dedicated space for your logo and branding

A Creative Space Just for You

Messaging you want to display? WANDA has a space for that and you can change it when you want!

Integrated Clock

Simple and Clean Design

We like to keep our buttons intuitive and clear. Making sure your guests know where to go for service is our priority.

Internet Connection

Our units can use either WiFi or Ethernet.

15" unit shown above.

A 10" simplified version of WANDA is available. It supports up to two restrooms and is perfect for offices, professional buildings and any other spaces with smaller restrooms."

Customizable Task List

WANDA's task list is meant to fit your needs and you can customize it to your facility.

Automatic Staff Notification

Once service has been requested, your cleaning staff receives an automatic email notification. Works with any email enabled device.

Unique Employee IDs

Track which employee is doing what, when, and where.

Traffic Sensors

WANDA can integrate with traffic sensors so you can know how many people are using your restrooms, and can adjust your cleaning accordingly.

Easy to Access Your Data

Looking for a more in depth look at your facility's restrooms? No problem, access your data online at any time and dig in to all the information WANDA collects: cleaning times, durations, response times, supply use, most common alerts, and more.

Nushield

All our screens are protected with an antimicrobial overlay. It's infused with silver-ions to kill bacteria.

The Benefits of wanda

Accountability

With WANDA's easy-to-use log-in function, employers know exactly when an employee cleaned the restroom and their response times.

This accountability can have greater benefits when dealing with insurance; in the unfortunate case that somebody claims your restrooms' uncleanliness has caused them harm, you can confidently prove that you have taken all the necessary precautions within reason.

Efficiency

Service is now easy for patrons to request. This means restrooms will be cleaned at required times, when requested, or, if integrated with traffic sensors, once a specified number of people have moved through the facility. WANDA's emailed alerts ensure that the restroom is cleaned when needed. Tracking all this data allows for the most efficient use of staff and an opportunity for savings.

WANDA can also track supply usage. This information can be used to predict patterns in supply stock during high and low times, assuring supplies will never run short.

"WANDA has proven to be extremely valuable for CrossIron Mills in being able to track and monitor activities related to restroom cleaning. The staff learned the system quickly and WANDA is now providing us with data that we never had before. We are very impressed with the technology and Visionstate's support"

*-Ross McAlpine, Operations Manager,
CrossIron Mills Mall*

Customer Service

WANDA gives your customers a voice to let you know if anything in your restroom needs servicing. This builds a level of trust with your visitors in showing that you care not only about your facilities but their visit as well.

With WANDA's simple to use administrative website, information can be checked instantly. When something goes wrong, it won't be for long. Employee response times, number of notifications, and amount of traffic, are some of the many pieces of data that can be found at your convenience through our site.

Appearance

Technology is being added to most aspects of people's lives, to a point where it is almost expected. The simple act of installing WANDA will increase the modern appeal of the building in the eyes of a patron.

The cleanliness of a facility reflects greatly upon a business itself, with WANDA installed and the restrooms cleaned when needed, business will never appear better.

A client noticed that Floor alerts made up a large percentage of their issues. After looking into it, they noticed it was because the paper towels were placed on the opposite wall from the sinks, so people would drip across the floor. WANDA showed them an ongoing problem with an easy solution and they simply moved the paper towels closer to the sink.

wanda

how to use

Customers

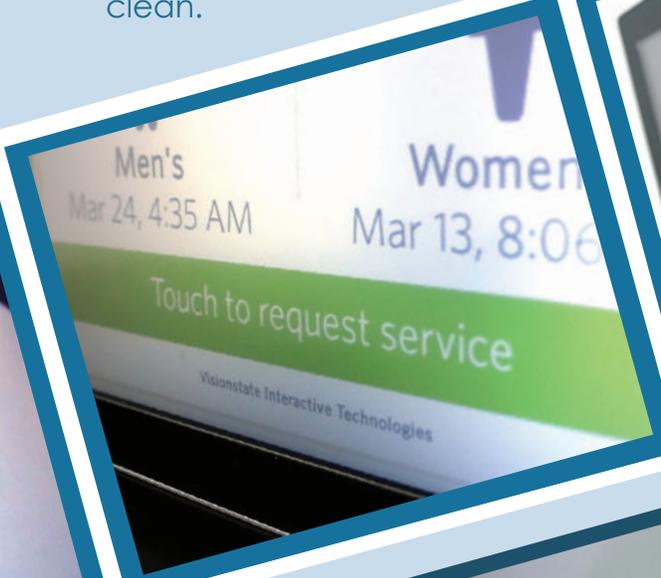

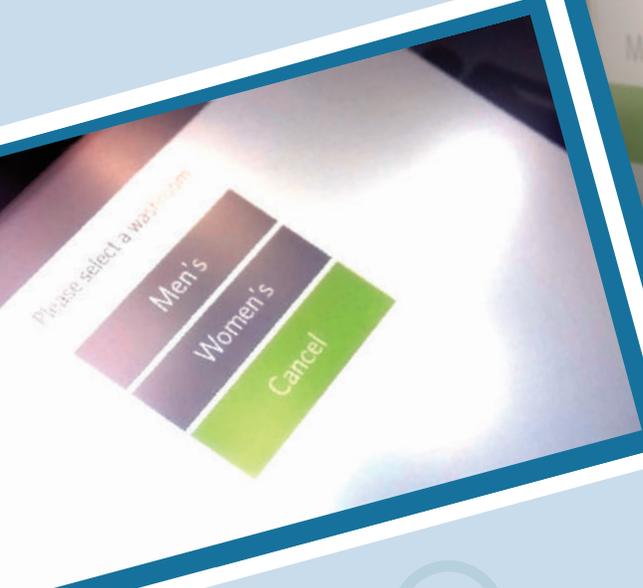

- 1) Request for service after an issue has been noted.
- 2) Select the restroom needing attendance.
- 3) Indicate what needs attention.
- 4) Service has been requested; screen locked to prevent double requests.

Staff

- 1) Sign in with their unique ID after they receive the alert emails.
- 2) Select what needed to be cleaned and what resources were used.
- 3) Sign out, signifying that the entire restroom is now clean.

Manager

- 1) Log in to the Content Management System to see who cleaned the restroom, how long it took till the issue was addressed, and what resources have been used.

Software Support Includes

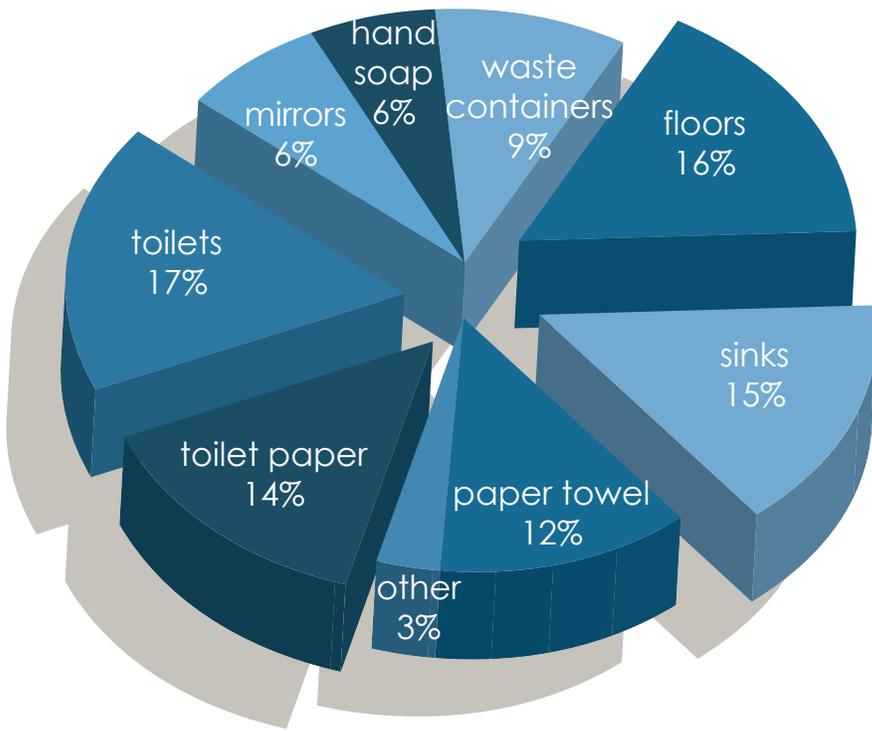

Preventative Resources:

- Software Updates

Support Services:

- Data storage
- Account Management
- Report generation
- Training

Alerts Breakdown

From the recorded alerts on WANDA, you can export the information into Excel to determine what areas require the most attention, which may highlight an ongoing concern.

A high percentage of Floor or Sink alerts may simply indicate a poorly placed towel or soap dispenser.

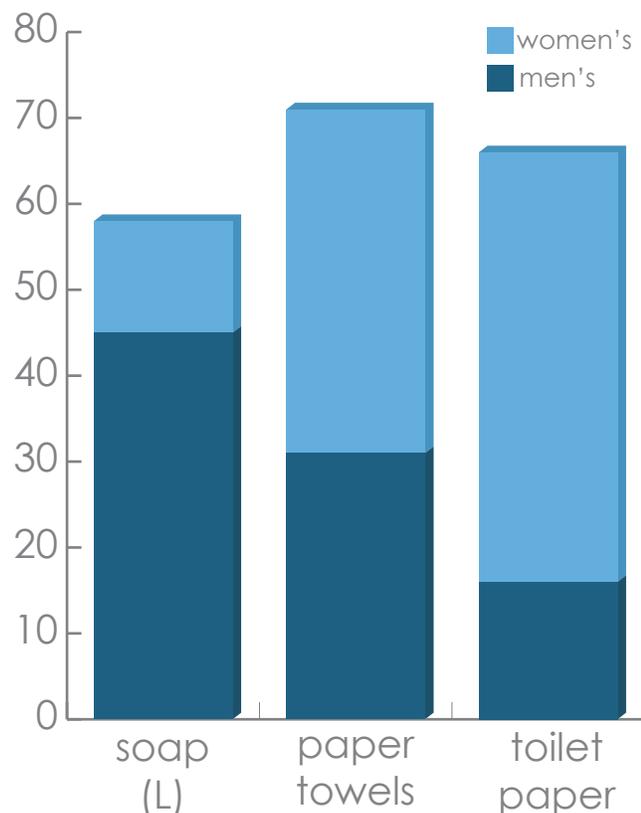

wanda

How Analytics Help.

Supply Breakdown

WANDA keeps track of supplies to display what you have used and when. This information can help you determine future resource allocation and supply management over time.

At this location, men are using substantially more soap than women.

Got Questions?

wanda

What kind of set-up is required?

a. WiFi/Ethernet: Internet access is needed for WANDA to send 'Requests for Service', as well as for data exchange, updates and maintenance.

b. Power: WANDA requires a standard 120V outlet. Many properties prefer to run power to the point where the unit will be and recess in the wall to hide cords.

c. Wall Mount: WANDA comes with a Vesa wall mount that will need to be installed.

How is property management notified there is a problem in the restroom?

An email will be sent out to recipients who have been added via the administration website.

How long does it take for information entered into the Content Management System website to take effect?

The information takes approximately 15 minutes to transmit down to the WANDA units.

How long does it take for information to become live for viewing in reports?

Report data can take up to an hour to become available for viewing on the website.

How does the antimicrobial film work?

Visit the NuShield website (nushield.com) for bacterial overlay information.

Can the screens be cleaned?

Yes, typical cleaning supplies can be used on the screens. The front of the screen is manufactured to prevent cleaning solutions from affecting the unit's performance.

Does the WANDA unit support video advertisements/messaging?

"Not at the present time but we are constantly improving and creating new features in our software."

What formats can the reports be exported to?

Reports can be exported in PDF, Excel and CSV formats.

Where should the WANDA unit be installed?

The WANDA unit should be installed outside of the restroom next to the entrance. This allows ease of access to the unit and for servicing multiple restrooms.

What if there is a Firewall blocking internet connectivity?

It should be possible to give internet access to the WANDA device to communicate with outside sources. It is hard to predict issues that may arise with firewalls as they are all different and will have to be evaluated on a case by case basis. WiFi network details will have to be communicated before the unit's delivery for proper configuration.

How does the Notification system work and how will my frontline staff be notified?

'Requests for Service' are obtained by Email. As many accounts as needed can be added to the system and notified. If the facility has a management staff that dispatches frontline staff then they may want to be the only ones with access to email notification. If each frontline staff would like an account that is possible as well.

Can notifications come via Pagers?

Most new alphanumeric pagers do display email notifications, however older pagers may not be compatible. Clients should contact their pager providers and see if their plan supports email.

Can I view the WANDA Content Management System from any internet browser?

Yes, every browser supports the WANDA CMS.

How long is the power cord?

They are 7 ft.
