# COVERSTAR® Automatic Safety Cover

## CS300™ HD AUTO SPA

The CS300HD Automatic Spa Package provides an attractive and effective solution for spa systems, swim spas, and smaller pools up to 12' x 24'. The tuck under motor design allows the system to be installed with two-thirds less of an offset than standard systems, yet the systems high torque capacity ensures smooth cover operation.

The spa package includes the CS300HD drive mechanism, cover fabric, track, one inch flat leading edge tube, four inch roll up tube, and a standard touch pad control switch.

For information on using the CS300HD mechanism for larger covers, please contact your Authorized Coverstar® Distributor.

Flat Lid

Stone/Masonry Lid

The CS300HD™ automatic safety cover has superior engineering based on more than 35 years of field experience. System reliability and the following high quality components are compelling benefits that make it the preferred choice of spa owners everywhere:

### Submersible Motor

The CS300HD motor's hardened stainless steel shaft and oil bathed gears virtually eliminate motor problems. It is also sealed against water by the original motor manufacturer.

### Durable Mechanism

Heavy-duty, stainless steel components allow the CS300HD mechanism to endure harsh environments giving you many years of reliable service.

### Guides and Sliders

The heavy duty sliders are the strongest in the industry. A dedicated slide channel prevents binding and stress on the mechanism and increases system reliability.

### PowerFlex Rope

Powerflex rope behaves like a shock absorber that allows it to more forgiving and self-adjusting during operation.

### Exclusive Heat Sealed Webbing

This patented system feature is a substantial improvement over the common webbing attachment method and provides substantially longer webbing life and improved operation of the cover.

### Heavy Duty Fabric

The heavy duty vinyl fabric provides optimal ultraviolet, chemical and mildew resistance. Superior fabric strength, tear resistance, and abrasion resistance are enhanced through the extruded coating process and closed polyester weave.

### Safety

Children are most at risk when parents believe they are safely inside the house. A cover is considered the number one safety feature you can have on your spa.

Note: It is intended that people would walk on the pool cover only in case of an emergency.

### Go Green – Save Big Money

Because the CS300HD is so easy to use, your spa can be covered when it's not in use. That means you can save up to 70% on heating, 70% on spa chemicals, 50% on electricity, and 90% on water. In fact, your automatic safety cover can completely pay for itself in just a few years. Now that's green!

Add Heat (Passive Solar) and Reduce Heat Loss (Water Evaporation)

### A Cleaner Spa – A Happier You

You deserve the soothing and relaxing effects of a spa after a hard day at work, not the hassle of cleaning a dirty spa. With the flip of a switch your spa will be ready to enjoy.
