

SILENT KEY SALE for W5PJR

July 30, 2017

On March 5, 2017 Dean Showalter W5PJR lost his short difficult battle to cancer and passed away. Just before his death he asked me to handle the removal and sale of his radio equipment. In service to Dean and Alice I am performing that task to the best of my ability.

I have decided to publish the following lists to NM hams in advance of the Duke City Hamfest. This collection is extensive and took well over a month to dismantle and move. Dean was an extensive collector and restorer of vintage radio equipment as well as being a very active DXer and daily operator with modern equipment and antennas. There are well over 100 restored collectable radios with some being very rare. Most of his modern equipment was purchased new and many are in the original boxes complete with the receipts and manuals. He was big on receiver performance and any new radio is loaded with accessories including receiver filters.

I will be bringing a subset of this collection to the Hamfest, however moving it and displaying it all is logistically impossible. My intention with the lists as they are now (not quite complete) will provide the opportunity to request items for me to bring to the hamfest for inspection and purchase.

Please pass this list around to your club members and friends. The best way to contact me is to text the number listed on the bottom of the list or send email. You can also make an appointment with me to inspect and purchase any of these items at my home QTH. Location is near the intersection of Hwy 337 and Hwy 217 in the East Mountains area South of I-40.

I am still in the process of researching market value for these items and with the rare collectables, this is a difficult task. I have consulted several friends who are radio collectors themselves in placing value.

In honor of my good friend Dean W5PJR

Dave NN5K
