

Hunt Imaging

A History Of Research, Innovation and Quality

Hunt Imaging originated as Philip A. Hunt Chemical Company in 1909. Founded in Brooklyn, New York by Philip Arthur Hunt, the Company traded in raw “fine” chemicals and mixed chemistry for the motion picture industry.

Hunt’s reputation was built on a strong foundation of R&D and quality. The company’s innovations included the first liquid concentrate developers for X-ray films and then for the graphic arts industry. In the 1960’s, Hunt Chemical entered the color photofinishing business with the first lower replenishment developers, and opened a plant in Belgium. This began over 35 years of research and manufacturing activities in Europe. In 1984, Hunt developed its activities in the electrostatic toners for original equipment manufacturers and its photoresist business for the computer industry.

Today Hunt Imaging, a leading producer of liquid and dry toners, continues its 90-year tradition of innovative products development with the introduction of advanced quality toners and carriers for high-speed printers. Our newest product line of toners for IBM® Infoprint® Systems are designed to maximize productivity, minimize maintenance, and reduce cost per page.

R&D

The Hunt Imaging Technology Group is supported by specially equipped laboratories as well as state of the art production and quality control equipment. Our experience and expertise in particle technology together with related scientific disciplines permit us to explore a full range of technological concepts and arrive at proprietary imaging materials. Hunt holds numerous patents for chemistry, processes and applications of toner products

PRODUCTS AND SERVICES

We work closely with some of the world’s leading image equipment manufacturers, jointly developing toners to meet specialized requirements. Hunt Imaging’s specially formulated high quality products are currently being distributed to Original Equipment Manufacturers and through a worldwide distribution channel as Hunt Imaging and privately

labeled products. All Hunt imaging toner supplies meet or exceed the specifications developed by the Original Equipment Manufacturer.

QUALITY

Our status as a manufacturer with ISO 9001:2002 certified plants and laboratories in Berea, Ohio and Belgium is an achievement that demonstrates a clear commitment to world-class quality. Achieving this certification assures the highest level of quality control and manufacturing process controls available. At Hunt Imaging, consistency and quality are paramount.

SERVICE AND SUPPORT

Our international service and distribution capabilities allow us to deliver products to our customers in the quantities they need at the time they need them. We maintain sufficient inventories to support increasing demands of the larger distributor and data centers. Hunt Imaging products offer the opportunity of choice with high quality supplies that are value priced and backed by our 100% quality guarantee.
