Mandatory Language for Monitoring and Reporting Violation Failure to Submit Disinfectant Level Quarterly Operating Report (DLQOR) **MONITORING, ROUTINE (DBP), MAJOR/CHLORINE**

The CITY OF NATALIA Water System PWS ID 163009 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfections residuals within the distribution system, monitor the disinfectant residual at various locations through the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results or regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period of 1/01/16 – 3/31/16.

We are taking the following actions to address this issue: The 1st Quarter Report (1/01/16 – 3/31/16) was mailed to TCEQ on July 20, 2016.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Art Smith at (830) 663-2926.
