BIOLOGIST / WETLAND SCIENTIST

Tetra Tech, Inc. is a leader in consulting, engineering, environmental science and technical services worldwide. We are a diverse company, embracing talented individuals with expertise in science, research, engineering, construction, and information technology. Our strength lies in collectively teaming together to provide integrated services delivering the best solutions to meet our clients' needs.

Tetra Tech, Inc. is seeking a qualified Biologist/Wetland Scientist to support work at its Portland, ME office for wetland delineation and data management for our commercial energy, transmission, and federal programs.

The successful candidate will be responsible for supporting a variety of our natural resources projects, with a primary focus on performing wetland delineations and data management on our large linear development projects. A multidisciplinary science-based background and prior field experience of a similar nature is desired. Fieldwork may take place in a variety of environmental settings, potentially including working for long durations away from home, or working on foot in remote, mountainous, or uneven terrain. Work may be performed in a wide variety of weather conditions.

PRINCIPAL DUTIES AND RESPONSIBILITIES:

- Perform duties as Field Team Lead on field teams for biological field data collection.
- Perform natural resource surveys (e.g., wetlands, and vernal pools);
- Potential to assist or perform other natural resource surveys (e.g., wildlife, habitat, functional assessments, vegetation, aquatic resources, RTE species, and invasive species).
- Lead wetland delineations in accordance with current USACE 1987 Manual and Regional Supplement(s).
- Map habitat types and sensitive resources.
- Collect GPS data.
- Perform data entry, data analysis, and report compilation.
- Field components may require long hours and/or be physically demanding, and may require being on foot 10–12 hours per day carrying equipment.

EDUCATION, EXPERIENCE AND QUALIFICATIONS:

- A BS degree in Biology, Environmental Studies, Forestry, Natural Resources, or related field. MS degree preferred.
- A minimum of five years of experience in environmental consulting.
- Professional Wetland Scientist and New Hampshire Certified Wetland Scientist preferred.
- Experience conducting Wetland Function-Value assessment preferred.
- Working knowledge of Maine State Natural Resource Protection Act preferred.
- Well-developed leadership qualities.
- At least three year's demonstrated experience performing routine and atypical wetland delineations using the USACE 1987 Manual and Regional Supplement(s) and identifying wetlands with the Cowardin et al. (1979) classification system.
- Experience in performing biological studies and assessments in the northeastern U.S.
- GPS field data collection. Experience using Trimble and Terrasync, and Arc Collector App preferred.
- Proficiency with MS Office Suite.
- Proficiency with data management and organization.

complex world | CLEAR SOLUTIONS™

- A willingness to learn.
- Flexibility and ability to travel and work extended hours during the field season.
- Flexibility and adaptability to meet fast-paced demands.
- High motivation and an ability to work independently and as part of a team.
- Possess strong oral and written communication skills.
- Must be multi-task oriented and possess excellent problem solving skills.
- A valid Driver's License and a dependable personal means of transportation are required.
- Strong report writing and data analysis skills desired.
- Employee is expected to maintain a professional manner in all aspects of their work.
