Sunrise Wind
Mariners fact sheet

Project overview
The New York State Energy Research and Development Authority (NYSERDA) has selected Sunrise Wind to negotiate an Offshore Wind Renewable Energy Certificate (OREC) Agreement for an 880 MW offshore wind farm. Sunrise Wind is bringing unparalleled experience in developing offshore wind to New York. Ørsted is the global leader in offshore wind, while Eversource is New England’s largest energy company and premier electric transmission builder.

A good neighbor
Ørsted and Eversource are committed to being a valued part of the Long Island community. The project team is working with the fishing community, environmental advocates and regulatory authorities to ensure the project is designed, built and operated as safely and responsibly as possible.

Who
50/50 partnership between Ørsted and Eversource, with support from Con Edison and the New York Power Authority

What
Approximately 115 towers in a 1x1 nautical mile e/w + n/s grid pattern offshore wind farm, with the potential capacity to power more than half a million homes

When
Expected to be fully operational by 2024

Where
At least 30 miles east of Montauk Point, virtually unnoticeable to Long Island residents and beachgoers; planned interconnection point is the Holbrook and West-Bus substations in the town of Brookhaven within the Long Island Power Authority’s (LIPA) service territory

Why
100% renewable energy to help realize New York’s vision of becoming a leader
