Equinor Wind US LLC holds the BOEM Lease Area OCS-A 0520 which is 128,811 acres, approximately 22nm south of Martha’s Vineyard and 17nm southwest of Nantucket. This lease area has the potential to power more than 1 million homes.

Equinor is in the early stages of development. The following activities are expected in 2020:

- Project name to be released in early 2020.
- 3-day geophysical survey campaign to examine the proposed location for a floating LIDAR buoy, including an offshore fisheries representative that will be onboard the survey vessel.
- A floating LIDAR will be deployed in the lease area.
- Offshore environmental studies will be conducted to include a geophysical and geotechnical campaign across the lease area. Notifications and updates will be distributed to US Coast Guard and public stakeholders prior to work.
- Aerial wildlife surveys carried out by APEM once or twice a month.

Equinor Wind US is committed to engaging and collaborating with commercial and recreational fishing communities to ensure both fishing and offshore wind will successfully coexist.
