Notice to Mariners
Meteocean Buoy Recovery
Location: South Fork Wind Farm

Recovery Date: WX dependent / May 15th, 2020
Redeployment date: 5-7 days after recovery

AXYS Technologies, through Ørsted U.S. Offshore Wind, will perform a met-ocean buoy recovery operation of the pre-existing FLiDAR buoy. The buoy is equipped with AIS, MMSI: 993669001. Coordinates of the buoy are 41° 05’ 16” N lat. 71° 13’ 22” W long., as shown on the project area on the reverse side.

Communication:
During the recovery, any project vessel will broadcast their position via VHF radio on Channel 16 to notify mariners of work plan. Fishermen and mariners are requested to note the buoy location and to maintain a safe distance during fishing and marine activities.

Vessel:
NorthStar Challenger
LOA: 96 ft
Beam: 26 ft
IMO: 8940581
Call Sign: WDG 5396
