

WINE can survive a FLIGHT.

These new bottle protectors will keep wine safe in your suitcase, even when baggage handlers treat your luggage like a punching bag. Creators Summer Scarbrough and her mother, Elizabeth, used pool-toy technology to create VinniBag, an inflatable wine carrier capable of enduring bumpy turbulence and everything else, so you can finally take a nice bottle to a long-distance Thanksgiving dinner. Bonus: The bag can be reused and adapted to fit other breakables, like olive oil and jam jars. \$28; vinnibag.com
