

# RED TEAM

Introduction to Digital  
Security – Hacking, or,  
“how they do it”

Digital hacking is simply exploiting a vulnerability in code to make the system do something it was not designed for.

# Phases of a digital attack:

Recon

Target Identification

Dry Run

Live Run

Post Breach

Clean up

Getting in is just half the problem.

# Moving inside

## Finding the information

# EXFIL

Real hackers go after the people.  
Real hackers are your best friends.

Real hackers give you what you want.

# Social engineering

The weakest link = the people

Remember:  
When in doubt, Red Team it.
